Appleyard, Field, and Cobb's International Economics, 6th Edition is an International Economics textbook that offers a consistent level of analysis and treatment of the two main subdivisions of international economics—international trade theory and policy and international monetary theory and policy. Comprehensive and clear, the text helps students move beyond recognition toward an understanding of current and future international events. As with each prior edition, the authors provide current and timely information on the wide variety of international economic phenomena in the 6th Edition. New boxed items were added to cover emerging issues in the global economy. Chapter material was updated to include recent developments in U.S. trade policy, major changes in the European Union, progress in the transition from command to market economies, and special issues related to developing nations. These improvements are designed to help readers both understand and appreciate the growing importance of the global economy in their lives.

Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.
