Quick Reference to European VAT Compliance provides the information necessary to deal with common compliance challenges via a format that allows readers to readily locate pertinent guidance when needed. This highly practical reference distills the problem-solving process by anticipating the relevant challenges and providing reliable help. Quick Reference to European VAT Compliance consists of two distinct sections: - An overview of how the various VAT systems in Europe work, with particular attention paid to compliance issues; and - Detailed, country-specific VAT compliance profiles for each EU Member State plus Iceland, Norway and Switzerland. Authored by the experts at Deloitte's Global Tax Center (Europe), Quick Reference to European VAT Compliance is an indispensable tool for professionals seeking to proactively manage VAT compliance. The European VAT-network of Coopers & Lybrand explains how each country has implemented the Council Directive 91/680/EEC and amending Directive 92/III/EEC on VAT and provides an overview from a European perspective. For ease of use, the book is divided into three parts. The first part examines the main features of the new VAT-system and provides an overview. The second part comments, on a country by country basis, on key points, and includes in particular, the key rules for each country governing whether you are liable to VAT in that country and if so, the obligations you must comply with. The third part is of nature of an appendix and

This book is specifically written for business managers and their professional advisers. With the establishment of the European Union on January 1 1993 new VAT rules were introduced covering the changed taxable transactions and new administrative formalities that came into being after the abolition of internal tax frontiers. The new regulations apply in particular to trade between the Member States and to activities related to freight transport. The basic features of the new rules are discussed in Part I, national laws and administrative procedures implementing the new EC regulations are treated in Part II while Part III consists of an appendix containing tables and an integration of the Sixth Directive and the 1991, 1992 and 1994 amending Directives.

The book has been updated to reflect these developments. The purpose of the book is to explain and simplify issues for tax advisors involved in transactions of buying and selling companies and business, enabling negotiations between tax advisors to keep sight of the commercial reality of the transaction (a sale by a willing seller to a willing buyer). The purpose of the tax schedule is to determine where responsibilities and risks will lie following the completion of the transaction, as well as to re-examine a number of so-called 'market practices'. The intended readership of the book is tax lawyers, tax accountants, corporate lawyers, corporate advisors and finance directors who are involved in the process of the sale of a company. This edition contains an extended glossary, details of new investor relief schemes and changes in legislation as announced as at 15 September 2016.

gains tax. Should capital gains--the increase in value of assets such as stocks or businesses--be taxed at all? If so, when should they be taxed--when they are earned, or when they are realized? Should taxes be adjusted for inflation? And should gains be taxed at both the individual and corporate levels? In this book, Leonard Burman cuts through the political rhetoric to present the facts about capital gains. He begins by explaining the complex rules that govern the taxation of capital gains, examines the kinds of assets that produce them, and the factors that can lead to gains or losses. He then reviews the effects of capital gains taxation on saving and investment and considers the arguments for and against indexing capital gains taxes for inflation, as well as other options for altering the current system.

important concepts such as substance versus form, economic substance, and the recission doctrine are explained. While the book does not discuss every statutory provision of the Code, many are examined and explained. For example, the operation of the capital gains provisions, the quasi-capital asset provision of section 1231, the medical expense provision, the nonrecognition provisions of sections 108, 1031 and 1033 are examined in detail. Not only is section 108 examined, but the larger topic of cancellation of indebtedness is discussed. The authors devote significant attention to sections 1031 and 1033 because those provisions are typical of nonrecognition statutes and prepare a student for the complex nonrecognition provisions the student will encounter in an advanced tax course. Depreciation and recapture of depreciation are examined in detail and their underlying principles are described. In addition to textual discussion of statutes and basic tax concepts and principles, the authors have provided a number of illustrations to show how the various provisions of the Code operate. There is discussion of the tax policies that underlie statutory provisions and how the knowledge of those policies can help arrive at a proper construction and application of the statutes. The book incorporates the changes to the Code made by the 2017 Tax Cuts and Jobs Act.

Resumen: Published annually, this handy two-volume set provides a comprehensive overview of the most essential parts of VAT Directives in Europe. This book set serves as a textbook for advanced students of tax law and/or Community law and as a reference book for (indirect) tax law or Community law practitioners. Volume 1: Introduction to European VAT This volume offers a systematic survey of the implications of the legal principles on indirect tax matters and VAT rules of the European Union in force, and a discussion of the case law of the Court of Justice of the European Union in indirect tax matters, particularly in VAT. It is divided into two parts: (I) General subjects and (II) European VAT. Following a general introduction on VAT as fiscal phenomenon, European VAT is discussed as provided for in the Sixth VAT Directive as replaced by Council Directive 2006/112/EC on the common system of VAT (the recast VAT Directive, referred to as the VAT Directive). VAT issues are illustrated by excerpts from decisions of the Court of Justice. The changes from the VAT package are included, and all chapters and references are updated with the changes from the Lisbon Treaty. Volume 2: Integrated Texts of the VAT Directives and the former Sixth VAT Directive This volume provides an (unofficial) integrated text of Council Directive 2006/112/EC on the common system of VAT and the Directives amending it, including Regulation (EC) No. 282/2011, the recast implementing Regulation, as amended. Early July 2012, the Commission made available a list of guidelines agreed on by the VAT Committee. In footnotes, the guidelines are mentioned relating to the provision in question. An (unofficial) integrated text of the Sixth VAT Directive as applicable until 1 January 2007 is also

It does not assume that readers are specialists in either subject, which means it should have a wide appeal among finance staff within the NHS as well as general practitioner accountants and VAT consultants. The second edition of VAT & the NHS is based on published HMRC and HM Treasury guidance and policy and on current case law and legislation in force as at 30 June 2016 and is revised to include the recent structural changes in the NHS and developments arising from the Budget 2015 and 2016 (as well as the potential implications of Brexit). The book helps to identify all of the issues in the tax relevant to the NHS and in a logical analysis explain these from an NHS compliance perspective and in relation to the organisational activities of the NHS (providing further references where appropriate if more detailed information is required). For reference there is a Glossary of Terms, a list of Definitions and a list of References. "The book provides a comprehensive overview of VAT in the context of the NHS.
