"Este Manual, dirigido especialmente a los estudiantes de Enfermería y otras disciplinas afines (fisioterapia, por ejemplo) representa una innovación en el mercado de los libros de texto profesionales. En efecto, se trata de una obra eminentemente didáctica, en el que cada tema, desde la aproximación global al cuerpo humano hasta la descripción de cada uno de los sistemas que lo conforman, ha sido tratado con un alto rigor científico que se une a la amenidad y simplicidad en la exposición, lo que hace el estudio más accesible en este tema fundamental para la formación de enfermeras. Destaca especialmente la presentación del texto, que se hace con abundantes gráficos y esquemas que ayudarán al estudiante en la adquisición de conocimientos sobre las bases anatómicas y fisiológicas del ser humano. Se complementa el contenido con algunos ejemplos de situaciones clínicas sencillas, pero muy clarificadoras, de alteraciones anatómicas o fisiológicas. Finalmente, desde el punto de vista del aprendizaje, es relevante la existencia en cada capítulo de actividades complementarias que apoyan la adquisición de los conocimientos" -- Enferteca.

An illustrated guide to the human anatomy, including its structure and organ functions.

The daily headlines continue to reflect and emphasize the necessity for expertise in the field of infection. "E. coli contaminated meat", "West Nile Virus spreads", "White Powder discovered", "Bacteria specific viral lysins may hold key to new class of antibiotics", "Hope for new AIDS vaccine trial" are just a few examples. New chapters are devoted to the rapidly emerging technologies that aid in the diagnosis and treatment of infection, the horrifying but real threat of biowarfare, and the role of the entire medical team, not just the ID doc. in combating infections. Content has been revised and updated to reflect current knowledge and understanding of infectious disease processes. The emphasis on the sound foundation of how to explore and discover new information is retained. Common infectious diseases are emphasized Treatment options are clearly detailed, including advantages and disadvantages of various regimens Useful background information is presented for every infection such as origin of the name, mode of transmission, typical hosts, geographic location, seasonal patterns, and associated clinical syndromes The three new chapters are the obligatory and timely bioterrorism, radiologic imaging, and surgical implications of infection

El currículum universitario de Enfermería, además de transmitir los conocimientos y habilidades necesarias para el inicio de la práctica profesional construye, inadvertidamente, una subjetividad en las estudiantes que las lleva a aceptar las relaciones jerárquicas y de poder

que subsisten hoy día en la asistencia sanitaria. Relaciones que inmovilizan la enfermería profesional y la sitúan en un papel subordinado y disuelven y ocultan sus saberes disciplinares en la lógica hegemónica. Este es un libro de análisis y también de metodología de investigación cualitativa en el que se ofrecen las claves para el estudio etnográfico. Permite profundizar en los límites y posibilidades que la investigación etnográfica ofrece como un saber más respetuoso con la complejidad real de los procesos sociales de enseñanza y aprendizaje de la enfermería, sin distorsionarlos mediante su simplificación o fragmentación; y aporta orientaciones básicas a las personas interesadas en realizar investigaciones bajo este enfoque.

Road traffic collisions kill about 1.2 million people around the world every year but they are largely neglected as a health and development issue, perhaps because they are still viewed by many as being beyond human control. Efforts to prevent road traffic injuries are hampered by a lack of human capacity. Policy-makers, researchers and practitioners need information on effective prevention measure and on how to develop, implement and evaluate such interventions. There is a need to train more specialists in road traffic injury prevention in order to address the growing problem of road traffic injuries at international levels.
