"In his motivational and easy-to-read style, Pat Williams once again articulates the universal lessons to be learned from the world of sports. As an 'old QB,' I was reminded of my won experiences and the valuable lessons on the 'fields of friendly strife.' Anyone committed to being a part of a team or building a team must read *The Magic of Teamwork*." Jack Kemp, Vice President Candidate 1996 and Former Secretary of Housing and Urban Development.

A pioneering philanthropist and daughter of American royalty reveals what it was like to grow up in one of the world's most famous families. The great-granddaughter of John D. Rockefeller, Eileen Rockefeller learned in childhood that while wealth and fame could open any door, they could not buy a feeling of personal worth. The privileges of having servants and lavish summer homes were offset by her parents' thoughtful yet firm lessons in social obligation, at times by her mother's dark depressions and mercurial moods, and the competition for attention among her siblings. In adulthood, Rockefeller has yearned to be seen not as an icon but as a woman and mother with a normal life, and like all of us, she had to learn to find her own way. *Being a Rockefeller, Becoming Myself* is an affirmation of how family shapes our identity and the ways we contribute to the larger family of life, regardless of our origins.

John Jacob Astor - Cornelius Vanderbilt - Andrew Carnegie - John D. Rockefeller - Henry Ford - Joseph P. Kennedy - Even today, long after their deaths, the names of these six men continue to be associated with wealth and power. When they were alive, they dominated their worlds as few men had done before, and few have done since. Now in paperback, this book contains the life stories of six of the richest men who ever lived in America. Their lives offer us windows into ways of life that most of us can only imagine - an opportunity to glimpse times when laws, attitudes, prejudices, and opportunities were very different from today. Their achievements - financial, political, and social - continue to affect us to this day, for good or ill. Additionally, their mistakes still offer important lessons about the acquisition, use, and abuse of wealth and power. And had they not lived, the history of America - and the world - might have been very different indeed.

In the present book, *How to Win Friends and Influence People*, Dale Carnegie says, "You can make someone want to do what you want them to do by seeing the situation from the other person's point of view and arousing in the other person an eager want." You learn how to make people like you, win people over to your way of thinking, and change people without causing offense or arousing resentment. For instance, "let the other person feel that the idea is his or hers" and "talk about your own mistakes before criticizing the other person." This book is all about building relationships. With good relationships, personal and business successes are easy and swift to achieve. *Twelve Ways to Win People to Your Way of Thinking*

1. The only way to get the best of an argument is to avoid it.
2. Show respect for the other person's opinions. Never say "You're wrong."
3. If you're wrong, admit it quickly and emphatically.
4. Begin in a friendly way.
5. Start with questions to which the other person will answer yes.
6. Let the other person do a great deal of the talking.
7. Let the other person feel the idea is his or hers.
8. Try honestly to see things from the other person's point of view.
9. Be sympathetic with the other person's ideas and desires.
10. Appeal to the nobler

motives. 11. Dramatize your ideas. 12. Throw down a challenge.

In this hugely appealing book, a finalist for the Pulitzer Prize, acclaimed author and journalist Daniel Okrent weaves together themes of money, politics, art, architecture, business, and society to tell the story of the majestic suite of buildings that came to dominate the heart of midtown Manhattan and with it, for a time, the heart of the world. At the center of Okrent's riveting story are four remarkable individuals: tycoon John D. Rockefeller, his ambitious son Nelson Rockefeller, real estate genius John R. Todd, and visionary skyscraper architect Raymond Hood. In the tradition of David McCullough's *The Great Bridge*, Ron Chernow's *Titan*, and Robert Caro's *The Power Broker*, *Great Fortune* is a stunning tribute to an American landmark that captures the heart and spirit of New York at its apotheosis.

This early work on public speaking is both expensive and hard to find in its first edition. It contains a wealth of information on the voice, delivery, distinctness and much more. This is a fascinating work and is thoroughly recommended for anyone interested in the skills of public speaking. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork. Eanger Irving Couse (1866–1936) showed remarkable promise as a young art student. His lifelong interest in Native American cultures also started at an early age, inspired by encounters with Chippewa Indians living near his hometown, Saginaw, Michigan. After studying in Europe, Couse began spending summers in New Mexico, where in 1915 he helped found the famous Taos Society of Artists, serving as its first president and playing a major role in its success. This richly illustrated volume, featuring full-color

reproductions of his artwork, is the first scholarly exploration of Couse's noteworthy life and artistic achievements. Drawing on extensive research, Virginia Couse Leavitt gives an intimate account of Couse's experiences, including his early struggles as an art student in the United States and abroad, his study of Native Americans, his winter home and studio in New York City, and his life in New Mexico after he relocated to Taos. In examining Couse's role as one of the original six founders of the Taos Society of Artists, the author provides new information about the art colony's early meetings, original members, and first exhibitions. As a scholar of art history, Leavitt has spent decades researching her subject, who also happens to be her grandfather. Her unique access to the Couse family archives has allowed her to mine correspondence, photographs, sketchbooks, and memorabilia, all of which add fresh insight into the American art scene in the early 1900s. Of particular interest is the correspondence of Couse's wife, Virginia Walker, an art student in Paris when the couple first met. Her letters home to her family in Washington State offer a vivid picture of her husband's student life in Paris, where Couse studied under the famous painter William Bouguereau at the Académie Julian. Whereas many artists of the early twentieth century pursued a radically modern style, Couse held true to his formal academic training throughout his career. He gained renown for his paintings of southwestern landscapes and his respectful portraits of Native peoples. Through his depictions of the domestic and spiritual lives of Pueblo Indians, Couse helped mitigate the prejudices toward Native Americans that persisted during this era.

Art/Museums takes the study of international relations to the art museum. It seeks to persuade those who study international relations to take art/museums seriously and museum studies to take up the insights of international relations. And it does so at a time when both international relations and art are said to be at an end—that is, out of control and beyond sight of their usual constituencies. The book focuses on the British Museum, the National Gallery of London, the Museum of Iraq, the Museum of Modern Art in New York, the Getty museums, the Guggenheim museums, and "museum" spaces instantly created by the attacks on the World Trade Center in 2001. The art includes works over which museums might struggle, acquire through questionable means, hoard and possibly lose, such as the Parthenon sculptures, Raphael's *Madonna of the Pinks*, the ancient art of Babylon, modern art, and the art/museum itself in an era of rapid museum expansion. Bringing art, museums, and international relations together draws on the art technique of collage, which combines disparate objects, themes, and time periods in one work to juxtapose unexpected elements, leaving the viewer to relate objects that are not where they are expected to be.

"Makes a reader feel like a time traveler plopped down among men who were by turns vicious and visionary."—*The Christian Science Monitor*

The modern American economy was the creation of four men: Andrew Carnegie, John D. Rockefeller, Jay Gould, and J. P. Morgan. They were the giants of the Gilded Age, a moment of riotous growth that established America as the richest, most inventive, and most productive country on the planet. Acclaimed author Charles R. Morris vividly brings the men and their times to life. The ruthlessly competitive Carnegie, the imperial Rockefeller, and the provocateur Gould were obsessed with progress, experiment, and speed. They were balanced by Morgan, the gentleman businessman, who fought, instead, for a global trust in

American business. Through their antagonism and their verve, they built an industrial behemoth—and a country of middle-class consumers. *The Tycoons* tells the incredible story of how these four determined men wrenched the economy into the modern age, inventing a nation of full economic participation that could not have been imagined only a few decades earlier.

NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE BOSTON GLOBE, BOOKLIST, AND KIRKUS REVIEWS • From acclaimed historian Richard Norton Smith comes the definitive life of an American icon: Nelson Rockefeller—one of the most complex and compelling figures of the twentieth century. Fourteen years in the making, this magisterial biography of the original Rockefeller Republican draws on thousands of newly available documents and over two hundred interviews, including Rockefeller's own unpublished reminiscences. Grandson of oil magnate John D. Rockefeller, Nelson coveted the White House from childhood. "When you think of what I had," he once remarked, "what else was there to aspire to?" Before he was thirty he had helped his father develop Rockefeller Center and his mother establish the Museum of Modern Art. At thirty-two he was Franklin Roosevelt's wartime coordinator for Latin America. As New York's four-term governor he set national standards in education, the environment, and urban policy. The charismatic face of liberal Republicanism, Rockefeller championed civil rights and health insurance for all. Three times he sought the presidency—arguably in the wrong party. At the Republican National Convention in San Francisco in 1964, locked in an epic battle with Barry Goldwater, Rockefeller denounced extremist elements in the GOP, a moment that changed the party forever. But he could not wrest the nomination from the Arizona conservative, or from Richard Nixon four years later. In the end, he had to settle for two dispiriting years as vice president under Gerald Ford. In *On His Own Terms*, Richard Norton Smith re-creates Rockefeller's improbable rise to the governor's mansion, his politically disastrous divorce and remarriage, and his often surprising relationships with presidents and political leaders from FDR to Henry Kissinger. A frustrated architect turned master builder, an avid collector of art and an unabashed ladies' man, "Rocky" promoted fallout shelters and affordable housing with equal enthusiasm. From the deadly 1971 prison uprising at Attica and unceasing battles with New York City mayor John Lindsay to his son's unsolved disappearance (and the grisly theories it spawned), the punitive drug laws that bear his name, and the much-gossiped-about circumstances of his death, Nelson Rockefeller's was a life of astonishing color, range, and relevance. *On His Own Terms*, a masterpiece of the biographer's art, vividly captures the soaring optimism, polarizing politics, and inner turmoil of this American Original. Praise for *On His Own Terms* "[An] enthralling biography . . . Richard Norton Smith has written what will probably stand as a definitive Life. . . . *On His Own Terms* succeeds as an absorbing, deeply informative portrait of an important, complicated, semi-heroic figure who, in his approach to the limits of government and to government's relation to the governed, belonged in every sense to another century."—*The New Yorker* "[A] splendid biography . . . a clear-eyed, exhaustively researched account of a significant and fascinating American life."—*The Wall Street Journal* "A compelling read . . . What makes the book fascinating for a contemporary professional is not so much any one thing that Rockefeller achieved, but the portrait of the world he inhabited not so very long ago."—*The New York Times* "[*On His Own Terms*] has perception and scholarly

authority and is immensely readable.”—The Economist

Worthwhile Places is a fascinating inside look at the history of some of our most treasured national parks. The book illuminates a remarkable public-private partnership that helped to shape our national park system. The close association and warm and lasting friendship between John D. Rockefeller, Jr. and Horace M. Albright is documented through 211 letters covering a 36-year period. The letters portray a common concern for and love of our nation's natural heritage and efforts which preserved countless scenic wonders for future generations. Horace Albright joined the National Park Service at its inception in 1916. He was superintendent of Yellowstone National Park and later director of the National Park Service. After he left government service, he remained active in the conservation movement until his death in 1987. John D. Rockefeller, Jr., a generous supporter of the national park system and other conservation and preservation activities, was one of the earliest proponents of private sector cooperation with the national government's preservation efforts. The letters provide insights into the plannings and problem solving which led to the creation of Acadia, Grand Teton, Grand Smoky Mountains, and Virgin Islands national parks as well as other conservation/preservation efforts for the California Big Trees, Florida's Bald Cypress Swamp, and Colonial Williamsburg. Dr. Joseph Ernst's Overview and Epilogue place the letters in their historical perspective and provide glimpses into the lives of John D. Rockefeller, Jr. and Horace M. Albright. This selection of letters highlights the sweep of their vision for America's outdoors, which literally stretched from coast to coast.
