

## Chapter 14 Marketing Promotion Robertleecannon

Green Fires is the story of Annie Saunders, a disillusioned Kennedy-era Peace Corps volunteer, returning to Ecuador, hoping to come to terms with her traumatic experiences there. What she finds instead is a menacing and mysterious trail which she determinedly follows--ever deeper into the jungle--uncovering a sinister secret of international dimensions. *Betas of Achievement Being Brief Biographical Records of Members of the Beta Theta Pi who Have Achieved Distinction in Various Fields of Endeavor* The Last Gasp The Rise and Fall of the American Gas Chamber Univ of California Press Collects stories of escapes from kidnappers, jails, natural disasters, oppressive regimes, man-made disasters, and military prisons.

Author Christianson tells the engaging story of captured Virginia fugitive slave Charles Nalle and those who helped him on his way to freedom. Nalle had been aided in his initial escape from slavery by the Underground Railroad, captured, and then forcibly freed by Harriet Tubman and others in New York in 1860. It's a well-written, well-researched story that says as much about the tormented race relations in slavery-era America as it does about the men and women who helped him. Annotation ?2010 Book News, Inc., Portland, OR (booknews.com).

Personal documents, art, propoganda, and stories express the Japanese American experience in internment camps after the bombing of Pearl Harbor.

The story behind the massive white block letters set into a steep Los Angeles hillside—and the city and culture they represent: “Terrific.”—San Francisco Chronicle To so many who see its image, the Hollywood sign represents the earthly home of that otherwise ethereal world of fame, stardom, celebrity—the American and worldwide aspiration to be in the limelight, to be, like the Hollywood sign itself, instantly recognizable. How an advertisement erected in 1923, touting the real estate development Hollywoodland, took on a life of its own is a story worthy of a movie itself. Leo Braudy traces the remarkable life of this distinctly American landmark, which has been saved over the years by a various fans and supporters, among them Alice Cooper and Hugh Hefner, who spearheaded its reconstruction in the 1970s. He also uses the sign’s history to offer an intriguing look at the rise of the film business from its earliest, silent days through the development of the studio system that helped define modern Hollywood. Mixing social history, urban studies, literature, and film, along with forays into such topics as the lure of Hollywood for utopian communities and the development of domestic architecture in Los Angeles, *The Hollywood Sign* is a fascinating account of how a temporary structure has become a permanent icon of American culture. “An entertaining tale.”—The Washington Post

I Modern times has invented its own brand of Apocalypse. Famine is no longer one of the familiar outriders. The problems of material life, and

their political and psychological implications, have changed drastically in the course of the past two hundred years. Perhaps nothing has more profoundly affected our institutions and our attitudes than the creation of a technology of abundance. - Even the old tropes have given way: neither dollars nor calories can measure the distance which separates *gagne-pain* from *gagne-hi/leek*.<sup>1</sup> Yet the concerns of this book seem much less remote today than they did when it was conceived in the late sixties. In the past few years we have begun to worry, with a sort of expiatory zeal, about the state of our environment, the size of our population, the political economy and the morality of the allocation of goods and jobs, and the future of our resources. While computer projections cast a malthusian pall over our world, we have had a bitter, first-hand taste of shortages of all kinds. The sempiternal battle between producers and consumers rages with a new ferocity, as high prices provoke anger on the one side and celebration on the other. Even as famines continue to strike the third world in the thermidor of the green revolution, so we have discovered hunger in our own midst.

In 1934, voters hoping to turn the tide of the Great Depression backed an unlikely candidate for governor of California: Upton Sinclair, muckraking author of *The Jungle* and lifelong socialist. Amazingly, Sinclair swept the Democratic primary, leading a mass movement called EPIC (End Poverty in California). Alarmed, Sinclair's opponents launched an unprecedented public relations blitzkrieg to discredit him. The result was nothing less than a revolution in American politics, and with it, the era of the "spin doctor" and the "attack ad" on the screen was born. Hollywood took its first all-out plunge into politics. In a riveting, blow-by-blow narrative featuring the likes of Franklin Roosevelt, Irving Thalberg, H. L. Mencken, William Randolph Hearst, Will Rogers, and Katharine Hepburn, Greg Mitchell brings to life the outrageous campaign that forever transformed the electoral process.

A compelling page-turner, *Mainliner Denver* delivers a shock to the system. Fasten your seat belt. Lock your tray table and get ready - it's going to be a bumpy ride. Join history buff and researcher Andrew J. Field as he probes the annals of aviation history, unraveling the mystery behind the bombing of *Mainliner Denver*. In an absorbing and investigative style, Field paints a picture of the aviation world leading up to and following this incredible story.

Winner of the J. B. Jackson Prize for the Best Book in Cultural Geography!

A miraculous, funny, eye-opening and inspirational story for all animal lovers. Between five and twelve million animals are euthanized across the United States each year--more than one thousand every hour. Quentin, a Basenji mix, survived his death sentence and with his new owner, Randy Grim, has launched a campaign to end euthanization in shelters. Grim is the subject of the book "The Man Who Talks to Dogs," and the founder of Stray Rescue of St. Louis.

A new edition of Kaplan's landmark study on eighteenth-century French political economy, reissued with a new Foreword by Sophus A. Reinert. Based on research in all the Parisian depots and more than fifty departmental archives and specialized and municipal libraries, Kaplan's classic work constitutes a major contribution to the study of the subsistence problem before the French Revolution and the political economy of deregulatory reform. Anthem Press is proud to reissued this pathbreaking work together with a significant new historiographic companion volume by the author, "The Stakes of Regulation: Perspectives on 'Bread, Politics and Political Economy' Forty Years Later."

The *Railroad Construction Worker Passbook(R)* prepares you for your test by allowing you to take practice exams in the subjects you need to study.

'Reality Redefined' is a collection of 15 short stories with plots ranging from the seemingly mundane to characterizations of

creatures from alternate dimensions and distant planets. The various characters become entangled in situations involving angels, demons, a masterful illusionist, a shape-changing seductress, the spirit of a murdered child, etc. The action moves from an observation of street people panhandling in the Atlantic City bus terminal, to a space explorer permanently marooned on a hostile planet, to a man challenged by a minion of Satan to trade his life for that of his daughter, etc., all without missing a beat. For any person who is a fan of science fiction, fantasy, and the paranormal, this is without a doubt a must-read book.

From Columbus' voyages to the New World through today's prison expansion movements, incarceration has played an important, yet disconcerting, role in American history. In this sweeping examination of imprisonment in the United States over five centuries, Scott Christianson exposes the hidden record of the nation's prison heritage, illuminating the forces underlying the paradox of a country that sanctifies individual liberty while it continues to build and maintain a growing complex of totalitarian institutions. Based on exhaustive research and the author's insider's knowledge of the criminal justice system, *With Liberty for Some* provides an absorbing, well-written chronicle of imprisonment in its many forms. Interweaving his narrative with the moving, often shocking, personal stories of the prisoners themselves and their keepers, Christianson considers convict transports to the colonies; the international trade in captive indentured servants, slaves, and military conscripts; life under slavery; the transition from colonial jails to model state prisons; the experience of domestic prisoners of war and political prisoners; the creation of the penitentiary; and the evolution of contemporary corrections. His penetrating study of this broad spectrum of confinement reveals that slavery and prisons have been inextricably linked throughout American history. He also examines imprisonment within the context of the larger society. *With Liberty for Some* is a thought-provoking work that will shed new light on the ways in which imprisonment has shaped the American experience. As the author writes, "Prison is the black flower of civilization -- a durable weed that refuses to die."

Traces the life and career of the former Chief Justice of the Supreme Court, including his role as head of the Warren Commission, and assesses his impact on American society

Presents the artist's sketches, sumi paintings, and watercolors depicting the austerity, hardship, hope, and beauty he discovered in the internment camp, and includes a collection of his interviews and correspondence.

*The Last Gasp* takes us to the dark side of human history in the first full chronicle of the gas chamber in the United States. In page-turning detail, award-winning writer Scott Christianson tells a dreadful story that is full of surprising and provocative new findings. First constructed in Nevada in 1924, the gas chamber, a method of killing sealed off and removed from the sight and hearing of witnesses, was originally touted as a "humane" method of execution. Delving into science, war, industry, medicine, law, and politics, Christianson overturns this mythology for good. He exposes the sinister links between corporations looking for profit, the military, and the first uses of the gas chamber after World War I. He explores little-known connections between the gas chamber and the eugenics movement. Perhaps most controversially, he has unearthed new evidence about American and German collaboration in the production and lethal use of hydrogen cyanide and about Hitler's adoption of gas chamber technology developed in the United States. More than a book about the death penalty, this compelling history ultimately reveals much about

America's values and power structures in the twentieth century.

Between 1623 and 1960 (the date of the last execution as of 1999), Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont legally put to death more than 700 men and women for a wide variety of capital crimes ranging from army desertion to murder. This is a companion volume to *Legal Executions in New York State* and *Legal Executions in New Jersey*, both published by McFarland. It is comprised of chronologically arranged biographical entries for the executed persons. Each entry gives personal data on the executed person, including age, ethnicity, and gender, as well as a detailed account of the crime for which he or she was sentenced to death and information on the place and method of execution. Fully indexed.

Between 1933 and 1935, Lorena Hickok traveled across thirty-two states as a "confidential investigator" for Harry Hopkins, head of FDR's Federal Emergency Relief Administration. Her assignment was to gather information about the day-to-day toll the Depression was exacting on individual citizens. *One Third of a Nation* is her record, underscored by the eloquent photographs of Dorothea Lange, Walker Evans, and others, of the shocking plight of millions of unemployed and dispossessed Americans.

Examines the relationship between art and journalism in the 1930s, and discusses how intellectuals strove to be relevant during this trying time by using their own involvement in labor struggles to influence their art.

Innocent graphically documents forty-two recent criminal cases to find evidence of shocking miscarriages of justice, especially in murder cases. Based upon interviews with more than 200 people and reviews of hundreds internal case files, court records, smoking-gun memoranda, and other documents, Scott Christianson gets inside the legal cases, revealing the mistakes, abuses, and underlying factors that led to miscarriages of justice, while also describing how determined prisoners, post-conviction attorneys, advocates, and journalists struggle against tremendous odds to try to win their exonerations. The result is a powerful work that recounts the human costs of a criminal justice system gone awry, and shows us how wrongful convictions can—and do—happen everywhere.

Amerika, Florenwerke, Kalifornien.

For Viewers of the TNT Series *I Am the Night* and Fans of the *Root of Evil* Podcast, the Bestselling Book That Revealed the Shocking Identity of the Black Dahlia Killer and the Police Corruption That Concealed It for So Long A New York Times Bestseller An International Bestseller A New York Times Notable Book An Edgar Award Finalist In 1947, the brutal, sadistic murder of a beautiful young woman named Elizabeth Short led to the largest manhunt in LA history. The killer teased and taunted the police and public for weeks, but his identity stayed a mystery, and the murder remained the most tantalizing unsolved case of the last century, until this book revealed the bizarre solution. Steve Hodel, a retired LAPD detective who was a private investigator, took up the case, reviewing the original evidence and records as well as those of a separate grand jury investigation into a series of murders of single women in LA at the time. The prime suspect had in fact been identified, but never indicted. Why? And who was he? In an account that partakes both of *LA Confidential* and *Zodiac*, for the corruption it exposes and the insight it offers into a serial killer's mind, Hodel demonstrates that there was a massive police cover-up. Even more shocking, he proves that the murderer, a true-life Jekyll and Hyde who was a highly respected member of society by day and a psychopathic killer by night, was his own father. This edition of the book includes new findings and photographs added after the original publication, together with a new postscript by the author.

Theodore Hamm uses the 1960 execution of Caryl Chessman as a lens for examining how politics and debates about criminal justice

became a volatile mix that ignited postwar California. The effects of those years continue to be felt as the state's three-strikes law and expanding prison-construction program spark heated arguments over rehabilitation and punishment. Known as the Red Light Bandit, Chessman allegedly stalked lovers' lanes in Los Angeles. Eventually convicted of rape and kidnapping, he was sentenced to death in 1948. In prison he gained significant notoriety as a writer, beginning with his autobiographical *Cell 2455 Death Row* (1954). In the following years Chessman presented himself not only as an innocent man but also as one rehabilitated from his prior life of crime. He acquired an enthusiastic audience among leading criminologists, liberal intellectuals, and ordinary citizens, many of whom engaged in protests to halt Chessman's execution. Hamm analyzes how Chessman convinced thousands of Californians to support him, and why Governor Edmund G. (Pat) Brown, who opposed the death penalty, allowed the execution to go forward. He also demonstrates the intrinsic limits of the popular commitment to the rehabilitative ideal. *Rebel and a Cause* places the Chessman case in a broad cultural and historical context, relating it to histories of prison reform, the anti-death penalty movement, the popularization of psychology, and the successive rise and decline of the New Left and the more enduring rise of the New Right.

During World War II, Port Chicago was a segregated naval munitions base on the outer shores of San Francisco Bay. Black seamen were required to load ammunition onto ships bound for the South Pacific under the watch of their white officers--an incredibly dangerous and physically challenging task. On July 17, 1944, an explosion rocked the base, killing 320 men--202 of whom were black ammunition loaders. In the ensuing weeks, white officers were given leave time and commended for heroic efforts, whereas 328 of the surviving black enlistees were sent to load ammunition on another ship. When they refused, fifty men were singled out and charged--and convicted--of mutiny. It was the largest mutiny trial in U.S. naval history. First published in 1989, *The Port Chicago Mutiny* is a thorough and riveting work of civil rights literature, and with a new preface and epilogue by the author emphasize the event's relevance today.

*Outside the Lines* traces how sports laid a foundation for social change long before the judicial system formally recognized the inequalities of racial separation. Integrating sports teams to include white and black athletes alike, the National Football League served as a microcosmic fishbowl of the highs and lows, the trials and triumphs, of racial integration. Watching a football game on a Sunday evening, most sports fans do not realize the profound impact the National Football League had on the civil rights movement. Similarly, in a sport where seven out of ten players are black, few are fully aware of the history and contributions of their athletic forebears. Among the touchdowns and tackles lies a rich history of African American life and the struggle to achieve equal rights. Although the Supreme Court did not reverse their 1896 decision of "separate but equal" in the *Plessy v. Ferguson* case until more than fifty years later, sports laid a foundation for social change long before our judicial system formally recognized the inequalities of racial separation. Integrating sports teams to include white and black athletes alike, the National Football League served as a microcosmic fishbowl of the highs and lows, the trials and triumphs, of racial integration. In this chronicle of black NFL athletes, Charles K. Ross has given us the story of the Jackie Robinsons of American football.

A writer and a photographer provide a photographic view and narrative account of their trip through California

William Randolph Hearst's dazzling "castle" at San Simeon, California, is famous world round, yet only the aficionado can name Julia Morgan as the architect who built it. For more than thirty years she worked with Hearst in a rare collaboration, creating not only his art-filled hilltop palace but also a fairy-tale Bavarian "village" known as Wynton and many other commercial and domestic structures. Yet the Hearst commissions, notable as they are, are not Morgan's only claim to fame. One of the first women to graduate in civil engineering from the University of California, Berkeley, Morgan was the first woman ever to earn a certificate in architecture from the prestigious *Ecole des Beaux-*

Arts in Paris. Returning to her native San Francisco in 1902, she was well placed to profit from the surge of building that followed the great earthquake just four years later. A member of an informal "old-girls" network that linked the leaders of the increasingly active women's organizations, Morgan received commissions for schools, clubs, and conference centers, including major YWCA buildings from Salt Lake City to Honolulu. Churches, hospitals, sanitariums, sororities, and shopping centers - she designed them all, in a long career notable for a total of more than 700 structures designed and built. Her light-filled houses were carefully crafted in styles ranging from Arts and Crafts to Mediterranean and sizes ranging from modest cottage to elegant mansion. Her swimming pools were voluptuous, climaxing in the two peacock-hued beauties at San Simeon. Given the sweep of Morgan's accomplishments, it is astonishing that this is the first substantial book ever devoted to her career. Painstakingly researched for more than a decade by Sara Holmes Boutelle, founder of the Julia Morgan Association, this handsome volume lovingly documents Morgan's life and work. Letters, snapshots, working sketches, and blueprints bring the proces

This revised edition of Taylor's classic work on the internal-combustion engine incorporates changes and additions in engine design and control that have been brought on by the world petroleum crisis, the subsequent emphasis on fuel economy, and the legal restraints on air pollution. The fundamentals and the topical organization, however, remain the same. The analytic rather than merely descriptive treatment of actual engine cycles, the exhaustive studies of air capacity, heat flow, friction, and the effects of cylinder size, and the emphasis on application have been preserved. These are the basic qualities that have made Taylor's work indispensable to more than one generation of engineers and designers of internal-combustion engines, as well as to teachers and graduate students in the fields of power, internal-combustion engineering, and general machine design.
