

Curbside Consultation In Knee Arthroplasty 49 Clinical Questions Author Craig J Della Valle Published On April 2008

This book provides a review of liver diseases and transplantation that is comprehensive enough to provide an intellectual basis for the data, yet simple enough to be read and assimilate into clinical practice rapidly. The early chapters are summaries on topics such as early and late liver disease, workup and diagnosis, and pre- and post-transplant problems. The chapters that follow are liver disease-specific and cover the liver diseases physicians will encounter in their patients. The in-depth chapters provide disease-specific epidemiology and outcomes, as well as diagnostic tables and more detailed algorithms and management approaches. With two decades worth of teaching liver disease both formally as well as in rounds and informal "chalk talks" with residents and fellows, Dr. Robert S. Brown Jr presents a way to think about clinical liver problems with a simple algorithmic method.

A comprehensive guide, *Women's Health in IBD: The Spectrum of Care From Birth to Adulthood* will help providers approach the specific issues that women with inflammatory bowel disease (IBD) face throughout their lifetimes. This book will better equip providers to counsel and support women of all ages with IBD. In *Women's Health in IBD*, Drs. Bincy P. Abraham, Sunanda V. Kane, and Kerri L. Glassner focus on the unique aspects of care for women with IBD. Half of the IBD patient population is female. As we understand more about gender and sex differences in terms of genetics, physiology, and medical care, it is important to consider these factors between men and women to personalize their care. This book encompasses the entire life span of the female IBD patient through birth, adolescence, pregnancy, menopause, and older adult years. Each chapter includes discussions of medications, treatment plans, and common questions or controversies on important topics in IBD such as: Transitioning from pediatric to adult care Diet and nutrition Mental health Health maintenance Family planning Pregnancy and breastfeeding Menopause Concomitant irritable bowel syndrome *Women's Health in IBD: The Spectrum of Care From Birth to Adulthood* is an essential text that will help anyone who treats women with IBD, offering practical tools and takeaways for point of care and beyond.

Fundamentals of Revision Hip Arthroplasty: Diagnosis, Evaluation, and Treatment is a unique and very timely book designed for surgeons who are beginning to more commonly encounter hip revisions in their practice. Unlike many traditional books on revision, Fundamentals of Revision Hip Arthroplasty does not focus on the most difficult and challenging of cases. Rather, Fundamentals of Revision Hip Arthroplasty is intended to guide the surgeon in the evaluation of the failed or painful total joint replacement, review basic tenants and surgical principles of revision arthroplasty, and guide the surgeon in determining whether a given case is one that should be managed or is best referred to a tertiary orthopedic center. Along with their 32 contributors, Dr. David J. Jacofsky and Dr. Anthony K. Hedley provide detailed information inside Fundamentals of Revision Hip Arthroplasty, including appropriate preoperative evaluation, equipment requirements, surgical planning, need for augments and allograft, and surgical techniques. Surgeons will be tackling hip revision surgery more frequently as the number of these cases is exponentially increasing. Fundamentals of Revision Hip Arthroplasty provides a "go-to" resource to turn to for guidance by community arthroplasty surgeons, arthroplasty fellows, and residents.

This book reports on research and developments in human-technology interaction. A special emphasis is given to human-computer interaction, and its implementation for a wide range of purposes such as healthcare, aerospace, telecommunication, and education, among others. The human aspects are analyzed in detail. Timely studies on human-centered design, wearable technologies, social and affective computing, augmented, virtual and mixed reality simulation, human rehabilitation and biomechanics represent the core of the book. Emerging technology applications in business, security, and infrastructure are also critically examined, thus offering a timely, scientifically-grounded, but also professionally-oriented snapshot of the current state of the field. The book is based on contributions presented at the 3rd International Conference on Human Interaction and Emerging Technologies: Future Applications, IHET 2020, held on August 27-29, 2020. It offers a timely survey and a practice-oriented reference guide to researchers and professionals dealing with design and/or management of the new generation of service systems.

SAGES represents a worldwide community of surgeons that can bring minimal access surgery, endoscopy and emerging techniques to patients in every country.

New technologies, developments in implant design and advances in surgical technique have improved outcomes after joint replacement and decreased rate of complications. It is not a surprise that the number of arthroplasties increases steadily every year and nowadays more than one million patients undergo the procedure annually worldwide. This book is a sequel of a successful series dedicated to one of the fastest growing fields in orthopedics - arthroplasty. Aiming at dissemination of scientific research this book provides a profound overview of the recent evolution of technology and surgical techniques. New developments of implant design and current treatment strategies have been critically discussed by the contributing authors. The process of improving care for patients and standards of treatment requires straightforward access to up-to-date research and knowledge. The format of the publication allows easy and quick reference to shared ideas and concepts. We hope, that the current book will add significant contribution to the success of this endeavor.
