An instant bestseller when first published in 1929—biographies of twelve bold individuals from history and what they did to separate themselves from the pack. In his trademark journalist style, author William Bolitho details the lives of twelve great adventurers—Alexander the Great, Casanova, Christopher Columbus, Mahomet, Lola Montez, Cagliostro (and Seraphina), Charles XII of Sweden, Napoleon I, Lucius Sergius Catiline, Napoleon III, Isadora Duncan, and Woodrow Wilson. Bolitho elucidates both the struggles and successes that made these figures so iconic, and demonstrates how they all battled convention and conformity to achieve enduring fame and notoriety. "We are born adventurers," Bolitho writes, "and the love of adventures never leaves us till we are very old; old, timid men, in whose interest it is that adventure should quite die out. This is why all the poets are on one side, and all the laws on the other; for laws are made by, and usually for, old men." Though his essays are nearly one hundred years old, they encompass the timeless values of perseverance, bravery, and strength of spirit that have proven to resonate with the pioneers and thought leaders of today. "It's really quite good." —Elon Musk "Twelve Against the Gods provides an interesting perspective on what drove and impeded this group of adventurers . . . A good read for anyone who's interested in history or looking to find some motivation to switch things up and break the rules." —Áine Cain, Business Insider "I think Twelve Against the Gods is also very appropriate for this day and age. We need adventurers, and there still are a lot of adventurers." —China Ryall, daughter of William Bolitho

Lambretta and Vespa scooters dominated the British two-wheeled market back in the 1950s. Originally seen as a vehicle primarily for transport, the scooter quickly grew into something very different. Perceptions underwent a radical shift and machines once disregarded as a functional and mundane became a way of life for their owners. Subcultures such as the Mods and scooter boys grew up around the scooter, a focal point for fashions that have continued to develop. Soon each owner was customizing their scooter according to their own tastes and desires as far as their budget would allow. The age of the scooter as a status symbol had arrived. From the early days with chrome mirrors and lights in the 1960s to the extravagantly painted murals of the 1980s, owners were using their scooters as canvases upon which to express themselves. Rivalries sprang up and as competition between owners grew, so too did the outrageousness of their creations. Today the custom scooter scene thrives and is as strong as it ever has been - with fresh creations showcasing the talents and imaginations of their owners like never before. More and more people are reminiscing about the iconic scooters of yesteryear and the movement shows no signs of waning. This book goes right back to the beginning to look at how it all started, the different styles each decade produced and the most famous machines ever

built.

This book explores various and distinct aspects of environmental health literacy (EHL) from the perspective of investigators working in this emerging field and their community partners in research. Chapters aim to distinguish EHL from health literacy and environmental health education in order to classify it as a unique field with its own purposes and outcomes. Contributions in this book represent the key aspects of communication, dissemination and implementation, and social scientific research related to environmental health sciences and the range of expertise and interest in EHL. Readers will learn about the conceptual framework and underlying philosophical tenets of EHL, and its relation to health literacy and communications research. Special attention is given to topics like dissemination and implementation of culturally relevant environmental risk messaging, and promotion of EHL through visual technologies. Authoritative entries by experts also focus on important approaches to advancing EHL through community-engaged research and by engaging teachers and students at an early age through developing innovative STEM curriculum. The significance of theater is highlighted by describing the use of an interactive theater experience as an approach that enables community residents to express themselves in non-verbal ways.

When is it appropriate to return individual research results to participants? The immense interest in this question has been fostered by the growing movement toward greater transparency and participant engagement in the research enterprise. Yet, the risks of returning individual research results—such as results with unknown validity—and the associated burdens on the research enterprise are competing considerations. *Returning Individual Research Results to Participants* reviews the current evidence on the benefits, harms, and costs of returning individual research results, while also considering the ethical, social, operational, and regulatory aspects of the practice. This report includes 12 recommendations directed to various stakeholders—investigators, sponsors, research institutions, institutional review boards (IRBs), regulators, and participants—and are designed to help (1) support decision making regarding the return of results on a study-by-study basis, (2) promote high-quality individual research results, (3) foster participant understanding of individual research results, and (4) revise and harmonize current regulations.
