

Ebony And Ivy Race Slavery And The Troubled History Of Americas Universities Author Craig Steven Wilder Published On November 2013

A groundbreaking and incendiary exploration of the intertwined histories of slavery, racism, and higher education in America, from a leading African-American historian

Racism and discrimination have choked economic opportunity for African Americans at nearly every turn. At several historic moments, the trajectory of racial inequality could have been altered dramatically. Perhaps no moment was more opportune than the early days of Reconstruction, when the U.S. government temporarily implemented a major redistribution of land from former slaveholders to the newly emancipated enslaved. But neither Reconstruction nor the New Deal nor the civil rights struggle led to an economically just and fair nation. Today, systematic inequality persists in the form of housing discrimination, unequal education, police brutality, mass incarceration, employment discrimination, and massive wealth and opportunity gaps. Economic data indicates that for every dollar the average white household holds in wealth the average black household possesses a mere ten cents. In *From Here to Equality*, William Darity Jr. and A. Kirsten Mullen confront these injustices head-on and make the most comprehensive case to date for economic reparations for U.S. descendants of slavery. After opening the book with a stark assessment of the intergenerational effects of white supremacy on black economic well-being, Darity and Mullen look to both the past and the present to measure the inequalities borne of slavery. Using innovative methods that link monetary values to historical wrongs, they next assess the literal and figurative costs of justice denied in the 155 years since the end of the Civil War. Finally, Darity and Mullen offer a detailed roadmap for an effective reparations program, including a substantial payment to each documented U.S. black descendant of slavery. Taken individually, any one of the three eras of injustice outlined by Darity and Mullen--slavery, Jim Crow, and modern-day discrimination--makes a powerful case for black reparations. Taken collectively, they are impossible to ignore.

A groundbreaking exploration of the intertwined histories of slavery, racism, and higher education in America, from a leading African American historian. A 2006 report commissioned by Brown University revealed that institution's complex and contested involvement in slavery--setting off a controversy that leapt from the ivory tower to make headlines across the country. But Brown's troubling past was far from unique. In *Ebony and Ivy*, Craig Steven Wilder, a rising star in the profession of history, lays bare uncomfortable truths about race, slavery, and the American academy. Many of America's revered colleges and universities--from Harvard, Yale, and Princeton to Rutgers, Williams College, and UNC--were

soaked in the sweat, the tears, and sometimes the blood of people of color. Slavery funded colleges, built campuses, and paid the wages of professors. Enslaved Americans waited on faculty and students; academic leaders aggressively courted the support of slave owners and slave traders. Significantly, as Wilder shows, our leading universities, dependent on human bondage, became breeding grounds for the racist ideas that sustained them. *Ebony and Ivy* is a powerful and propulsive study and the first of its kind, revealing a history of oppression behind the institutions usually considered the cradle of liberal politics.

"*Constituting the American Mind* is about early efforts to establish a national university and what those efforts say about the nature and logic of American Constitutionalism. This book offers the first in depth study of the efforts to establish a national university from a constitutional perspective. While mostly noted in passing, the national university was put forward by every president from Washington to John Quincy Adams as a necessary supplement to the formal institutions of government; it would help constitute the American mind in a manner that carried forward the ideas the constitution rested on including, for example, the separation of the "civic" from the "theological.""

The 250th anniversary of the founding of Rutgers University is a perfect moment for the Rutgers community to reconcile its past, and acknowledge its role in the enslavement and debasement of African Americans and the disfranchisement and elimination of Native American people and culture. *Scarlet and Black* documents the history of Rutgers's connection to slavery, which was neither casual nor accidental—nor unusual. Like most early American colleges, Rutgers depended on slaves to build its campuses and serve its students and faculty; it depended on the sale of black people to fund its very existence. Men like John Henry Livingston, (Rutgers president from 1810–1824), the Reverend Philip Milledoler, (president of Rutgers from 1824–1840), Henry Rutgers, (trustee after whom the college is named), and Theodore Frelinghuysen, (Rutgers's seventh president), were among the most ardent anti-abolitionists in the mid-Atlantic. *Scarlet and black* are the colors Rutgers University uses to represent itself to the nation and world. They are the colors the athletes compete in, the graduates and administrators wear on celebratory occasions, and the colors that distinguish Rutgers from every other university in the United States. This book, however, uses these colors to signify something else: the blood that was spilled on the banks of the Raritan River by those dispossessed of their land and the bodies that labored unpaid and in bondage so that Rutgers could be built and sustained. The contributors to this volume offer this history as a usable one—not to tear down or weaken this very renowned, robust, and growing institution—but to strengthen it and help direct its course for the future. The work of the Committee on Enslaved and Disenfranchised Population in Rutgers History. Visit the project's website at <http://scarletandblack.rutgers.edu>

From the University of Virginia's very inception, slavery was deeply woven into its fabric. Enslaved people first helped to

construct and then later lived in the Academical Village; they raised and prepared food, washed clothes, cleaned privies, and chopped wood. They maintained the buildings, cleaned classrooms, and served as personal servants to faculty and students. At any given time, there were typically more than one hundred enslaved people residing alongside the students, faculty, and their families. The central paradox at the heart of UVA is also that of the nation: What does it mean to have a public university established to preserve democratic rights that is likewise founded and maintained on the stolen labor of others? In *Educated in Tyranny*, Maurie McInnis, Louis Nelson, and a group of contributing authors tell the largely unknown story of slavery at the University of Virginia. While UVA has long been celebrated as fulfilling Jefferson's desire to educate citizens to lead and govern, McInnis and Nelson document the burgeoning political rift over slavery as Jefferson tried to protect southern men from anti-slavery ideas in northern institutions. In uncovering this history, *Educated in Tyranny* changes how we see the university during its first fifty years and understand its history hereafter. "Incomparably vivid . . . as enthralling a portrait of family life [in colonial New England] as we are likely to have."—*Wall Street Journal* In the tradition of Laurel Thatcher Ulrich's classic, *A Midwife's Tale*, comes this groundbreaking narrative by one of America's most promising colonial historians. Joshua Hempstead was a well-respected farmer and tradesman in New London, Connecticut. As his remarkable diary—kept from 1711 until 1758—reveals, he was also a slave owner who owned Adam Jackson for over thirty years. In this engrossing narrative of family life and the slave experience in the colonial North, Allegra di Bonaventura describes the complexity of this master/slave relationship and traces the intertwining stories of two families until the eve of the Revolution. Slavery is often left out of our collective memory of New England's history, but it was hugely impactful on the central unit of colonial life: the family. In every corner, the lines between slavery and freedom were blurred as families across the social spectrum fought to survive. In this enlightening study, a new portrait of an era emerges.

Spanning three centuries of Brooklyn history from the colonial period to the present, *A Covenant with Color* exposes the intricate relations of dominance and subordination that have long characterized the relative social positions of white and black Brooklynites. Craig Steven Wilder -- examining both quantitative and qualitative evidence and utilizing cutting-edge literature on race theory -- demonstrates how ideas of race were born, how they evolved, and how they were carried forth into contemporary society. In charting the social history of one of the nation's oldest urban locales, Wilder contends that power relations -- in all their complexity -- are the starting point for understanding Brooklyn's turbulent racial dynamics. He spells out the workings of power -- its manipulation of resources, whether in the form of unfree labor, privileges of citizenship, better jobs, housing, government aid, or access to skilled trades. Wilder deploys an extraordinary spectrum of evidence to illustrate the mechanics of power that have kept African American Brooklynites in subordinate positions: from

letters and diaries to family papers of Kings County's slaveholders, from tax records to the public archives of the Home Owners Loan Corporation. Wilder illustrates his points through a variety of cases, including banking interests, the rise of Kings County's colonial elite, industrialization and slavery, race-based distribution of federal money in jobs, and mortgage loans during and after the Depression. He delves into the evolution of the Brooklyn ghetto, tracing how housing segregation corralled African Americans in Bedford-Stuyvesant. The book explores colonial enslavement, the rise of Jim Crow, labor discrimination and union exclusion, and educational inequality. Throughout, Wilder uses Brooklyn as a lens through which to view larger issues of race and power on a national level. One of the few recent attempts to provide a comprehensive history of race relations in an American city, *A Covenant with Color* is a major contribution to urban history and the history of race and class in America.

Now a Showtime limited series starring Ethan Hawke and Daveed Diggs Winner of the National Book Award for Fiction From the bestselling author of *Deacon King Kong* (an Oprah Book Club pick) and *The Color of Water* comes the story of a young boy born a slave who joins John Brown's antislavery crusade—and who must pass as a girl to survive. Henry Shackleford is a young slave living in the Kansas Territory in 1856--a battleground between anti- and pro-slavery forces--when legendary abolitionist John Brown arrives. When an argument between Brown and Henry's master turns violent, Henry is forced to leave town--along with Brown, who believes Henry to be a girl and his good luck charm. Over the ensuing months, Henry, whom Brown nicknames Little Onion, conceals his true identity to stay alive. Eventually Brown sweeps him into the historic raid on Harpers Ferry in 1859--one of the great catalysts for the Civil War. An absorbing mixture of history and imagination, and told with McBride's meticulous eye for detail and character, *The Good Lord Bird* is both a rousing adventure and a moving exploration of identity and survival.

Anyone studying the history of this institution in America must read Thelin's classic text, which has distinguished itself as the most wide-ranging and engaging account of the origins and evolution of America's institutions of higher learning.

Are colleges and universities in a period of unprecedented disruption? Is a bachelor's degree still worth the investment? Are the humanities coming to an end? What, exactly, is higher education good for? In *For the Common Good*, Charles Dorn challenges the rhetoric of America's so-called crisis in higher education by investigating two centuries of college and university history. From the community college to the elite research university—in states from California to Maine—Dorn engages a fundamental question confronted by higher education institutions ever since the nation's founding: Do colleges and universities contribute to the common good? Tracking changes in the prevailing social ethos between the late eighteenth and early twenty-first centuries, Dorn illustrates the ways in which civic-mindedness, practicality, commercialism, and affluence influenced higher education's dedication to the public good. Each ethos, long a part of American history and tradition, came to predominate over the others during one of the four chronological periods examined in the book, informing the character of institutional debates and telling the definitive story of its time. *For the Common Good* demonstrates how two hundred years of political, economic, and

social change prompted transformation among colleges and universities—including the establishment of entirely new kinds of institutions—and refashioned higher education in the United States over time in essential and often vibrant ways.

First published in 1998, *American Higher Education in the Twenty-First Century* offers a comprehensive entree to the central issues facing American colleges and universities today. This thoroughly revised edition brings the volume up to date on key topics of enduring interest. Placing higher education within its social and political contexts, leading scholars discuss finance, federal and state governance, faculty, students, curriculum, and academic leadership. Contributors also address major changes in higher education, especially the influence and incorporation of the latest technologies and growing concern about the future of the academy in a post-Iraq War setting. No other book covers such wide-ranging issues under the broader theme of higher education's relationship to society. Highly acclaimed and incorporating cutting-edge research, *American Higher Education in the Twenty-First Century* remains the standard reference in the field. Contributors: Philip G. Altbach, Benjamin Baez, Michael N. Bastedo, Robert O. Berdahl, Marjorie A. E. Cook, Melanie E. Corrigan, Judith S. Eaton, Peter D. Eckel, Gustavo Fischman, Roger L. Geiger, Lawrence E. Gladieux, Sara Goldrick-Rab, Patricia J. Gumport, Fred F. Harcleroad, D. Bruce Johnstone, Adrianna Kezar, Jacqueline E. King, Aims C. McGuinness Jr., Amy Scott Metcalfe, Michael Mumper, Michael A. Olivas, Robert M. O'Neil, Gary Rhoades, Frank A. Schmidlein, Sheila Slaughter, Daryl G. Smith, John Willinsky -- Higher Education Policy

What is the purpose of black colleges? Why do black colleges continue to exist? Are black colleges necessary? Historically Black colleges and universities (HBCUs) are at the same time the least studied and the least understood institutions of higher education and the most maligned and the most endangered. This unique study examines the mission of four-year HBCUs from the perspective of the campus president, as a foundation for understanding the relevance and role of these institutions. This is the first research to focus on the role of presidents of black colleges; is based on extensive interviews with fifteen presidents; and takes into particular account the type of campus environments in which they operate. Unlike community colleges, women's colleges, men's colleges, and Hispanic-serving colleges, Black colleges are racially identifiable institutions. They also vary significantly in, among other characteristics: size, control (public or private), religious affiliation, gender composition, and available resources. Although united in the historic mission of educating African Americans, each black college or university has its own identity and set of educational objectives. The book examines how presidents define and implement mission in the context of their campuses, view the challenges they face, and confront the factors that promote or hinder implementation of their missions.

A powerful, hopeful critique of the unnecessary death spiral of higher education, *The Great Mistake* is essential reading for those who wonder why students have been paying more to get less and for everyone who cares about the role the higher education system plays in improving the lives of average Americans.

The Space Age began just as the struggle for civil rights forced Americans to confront the long and bitter legacy of slavery, discrimination, and violence against African Americans. Presidents John F. Kennedy and Lyndon Johnson utilized the space program as an agent for social change, using federal equal employment opportunity laws to open workplaces at NASA and NASA contractors to African Americans while creating thousands of research and technology jobs in the Deep South to ameliorate poverty. *We Could Not Fail* tells the inspiring, largely unknown story of how shooting for the stars helped to overcome segregation on earth. Richard Paul and Steven Moss profile ten pioneer African American space workers whose stories illustrate the role NASA and the space program played in promoting civil rights. They recount how these technicians, mathematicians, engineers, and an astronaut candidate surmounted barriers to move, in some cases literally, from

the cotton fields to the launching pad. The authors vividly describe what it was like to be the sole African American in a NASA work group and how these brave and determined men also helped to transform Southern society by integrating colleges, patenting new inventions, holding elective office, and reviving and governing defunct towns. Adding new names to the roster of civil rights heroes and a new chapter to the story of space exploration, *We Could Not Fail* demonstrates how African Americans broke the color barrier by competing successfully at the highest level of American intellectual and technological achievement.

"Traces the history of abolition from the 1600s to the 1860s . . . a valuable addition to our understanding of the role of race and racism in America."—Florida Courier Received historical wisdom casts abolitionists as bourgeois, mostly white reformers burdened by racial paternalism and economic conservatism. Manisha Sinha overturns this image, broadening her scope beyond the antebellum period usually associated with abolitionism and recasting it as a radical social movement in which men and women, black and white, free and enslaved found common ground in causes ranging from feminism and utopian socialism to anti-imperialism and efforts to defend the rights of labor. Drawing on extensive archival research, including newly discovered letters and pamphlets, Sinha documents the influence of the Haitian Revolution and the centrality of slave resistance in shaping the ideology and tactics of abolition. This book is a comprehensive history of the abolition movement in a transnational context. It illustrates how the abolitionist vision ultimately linked the slave's cause to the struggle to redefine American democracy and human rights across the globe. "A full history of the men and women who truly made us free."—Ira Berlin, *The New York Times Book Review* "A stunning new history of abolitionism . . . [Sinha] plugs abolitionism back into the history of anticapitalist protest."—*The Atlantic* "Will deservedly take its place alongside the equally magisterial works of Ira Berlin on slavery and Eric Foner on the Reconstruction Era."—*The Wall Street Journal* "A powerfully unfamiliar look at the struggle to end slavery in the United States . . . as multifaceted as the movement it chronicles."—*The Boston Globe*

The Blackademic Life critically examines academic fictions produced by black writers. In it, Lavelle Porter evaluates the depiction of academic and campus life in literature as a space for black writers to produce counternarratives that celebrate the potentials of black intelligence and argue for the importance of black higher education, particularly in the humanistic tradition. Beginning with an examination of W. E. B. Du Bois's creative writing as the source of the first black academic novels, Porter looks at the fictional representations of black intellectual life and the expectations that are placed on faculty and students to be racial representatives and spokespersons, whether or not they ever intended to be. The final chapter examines blackademics on stage and screen, including in the 2014 academic film *Dear White People* and the groundbreaking television series *A Different World*.

"Focuses on networks of people, information, conveyances, and other resources and technologies that moved slave-based products from suppliers to buyers and users." (page 3) The book examines the credit and financial systems that grew up around trade in slaves and products made by slaves.

This book focuses on slave ownership in Virginia as it was practiced by a variety of institutions.

"Groundbreaking look at slaves as commodities through every phase of life, from birth to death and beyond, in early America *The Price for Their Pound of Flesh* is the first book to explore the economic value of enslaved people through every phase of their lives--including from before birth to after death--in the American domestic slave trades. Covering the full "life cycle" (including preconception, infancy, childhood, adolescence, adulthood, the senior years, and death), historian Daina Berry shows the lengths

to which slaveholders would go to maximize profits. She draws from over ten years of research to explore how enslaved people responded to being appraised, bartered, and sold. By illuminating their lives, Berry ensures that the individuals she studies are regarded as people, not merely commodities. Analyzing the depth of this monetization of human property will change the way we think about slavery, reparations, capitalism, and nineteenth-century medical education"--

This essential history of American higher education brings a fresh perspective to the field, challenging the accepted ways of thinking historically about colleges and universities. Organized thematically, this book builds from the ground up, shedding light on the full, diverse range of institutions—including small liberal arts schools, junior and community colleges, black and white women's colleges, black colleges, and state colleges—that have been instrumental in creating the higher education system we know today. *A People's History of American Higher Education* focuses on those participants who may not have been members of elite groups, yet who helped push elite institutions and the country as a whole. This pathbreaking textbook addresses key issues which have often been condemned to exceptions and footnotes—if not ignored completely—in historical considerations of U.S. higher education; particularly race, ethnicity, gender, and class. Hutcheson introduces readers to both social and intellectual history, providing invaluable perspectives and methodologies for graduate students and faculty members alike. *A People's History of American Higher Education* surveys the varied characteristics of the diverse populations constituting or striving for the middle class through educational attainment, providing a narrative that unites often divergent historical fields. The author engages readers in a powerful, revised understanding of what institutions and participants beyond the oft-cited elite groups have done for American higher education.

Winner of the 2015 Avery O. Craven Prize from the Organization of American Historians Winner of the 2015 Sidney Hillman Prize
A groundbreaking history demonstrating that America's economic supremacy was built on the backs of slaves Americans tend to cast slavery as a pre-modern institution -- the nation's original sin, perhaps, but isolated in time and divorced from America's later success. But to do so robs the millions who suffered in bondage of their full legacy. As historian Edward E. Baptist reveals in *The Half Has Never Been Told*, the expansion of slavery in the first eight decades after American independence drove the evolution and modernization of the United States. In the span of a single lifetime, the South grew from a narrow coastal strip of worn-out tobacco plantations to a continental cotton empire, and the United States grew into a modern, industrial, and capitalist economy. Told through intimate slave narratives, plantation records, newspapers, and the words of politicians, entrepreneurs, and escaped slaves, *The Half Has Never Been Told* offers a radical new interpretation of American history.

Slavery and the University is the first edited collection of scholarly essays devoted solely to the histories and legacies of this subject on North American campuses and in their Atlantic contexts. Gathering together contributions from scholars, activists, and administrators, the volume combines two broad bodies of work: (1) historically based interdisciplinary research on the presence of slavery at higher education institutions in terms of the development of proslavery and antislavery thought and the use of slave labor; and (2) analysis on the ways in which the legacies of slavery in institutions of higher education continued in the post-Civil

War era to the present day. The collection features broadly themed essays on issues of religion, economy, and the regional slave trade of the Caribbean. It also includes case studies of slavery's influence on specific institutions, such as Princeton University, Harvard University, Oberlin College, Emory University, and the University of Alabama. Though the roots of Slavery and the University stem from a 2011 conference at Emory University, the collection extends outward to incorporate recent findings. As such, it offers a roadmap to one of the most exciting developments in the field of U.S. slavery studies and to ways of thinking about racial diversity in the history and current practices of higher education.

From the subaltern assemblies of the enslaved in colonial New York City to the benevolent New York African Society of the early national era to the formation of the African Blood Brotherhood in twentieth century Harlem, voluntary associations have been a fixture of African-American communities. In the Company of Black Men examines New York City over three centuries to show that enslaved Africans provided the institutional foundation upon which African-American religious, political, and social culture could flourish. Arguing that the universality of the voluntary tradition in African-American communities has its basis in collectivism—a behavioral and rhetorical tendency to privilege the group over the individual—it explores the institutions that arose as enslaved Africans exploited the potential for group action and mass resistance. Craig Steven Wilder's research is particularly exciting in its assertion that Africans entered the Americas equipped with intellectual traditions and sociological models that facilitated a communitarian response to oppression. Presenting a dramatic shift from previous work which has viewed African-American male associations as derivative and imitative of white male counterparts, In the Company of Black Men provides a ground-breaking template for investigating antebellum black institutions.

A leading African-American historian of race in America exposes the uncomfortable truths about race, slavery and the American academy, revealing that our leading universities, dependent on human bondage, became breeding grounds for the racist ideas that sustained it.

Slavery, Geography and Empire in Nineteenth-Century Marine Landscapes of Montreal and Jamaica is among the first Slavery Studies books - and the first in Art History - to juxtapose temperate and tropical slavery. Charmaine A. Nelson explores the central role of geography and its racialized representation as landscape art in imperial conquest. One could easily assume that nineteenth-century Montreal and Jamaica were worlds apart, but through her astute examination of marine landscape art, the author re-connects these two significant British island colonies, sites of colonial ports with profound economic and military value. Through an analysis of prints, illustrated travel books, and maps, the author exposes the fallacy of their disconnection, arguing instead that the separation of these colonies was a retroactive fabrication designed in part to rid Canada of its deeply colonial history as an integral part of Britain's global trading network which enriched the motherland through extensive trade in crops produced by enslaved workers on tropical plantations. The first study to explore James Hakewill's Jamaican landscapes and William Clark's Antigua genre studies in depth, it also examines the Montreal landscapes of artists including Thomas Davies, Robert Sproule, George Heriot and James Duncan. Breaking new ground, Nelson reveals how gender and race mediated the aesthetic and scientific

access of such - mainly white, male - artists. She analyzes this moment of deep political crisis for British slave owners (between the end of the slave trade in 1807 and complete abolition in 1833) who employed visual culture to imagine spaces free of conflict and to alleviate their pervasive anxiety about slave resistance. Nelson explores how vision and cartographic knowledge translated into authority, which allowed colonizers to 'civilize' the terrains of the so-called New World, while belying the oppression of slavery and indigenous displacement.

Ebony and IvyRace, Slavery, and the Troubled History of America's UniversitiesBloomsbury Publishing USA

Presents a collection of essays that explore a college education as a means through which serious-minded individuals broaden their minds and acquire life skills, arguing that higher learning is an essential remedy for today's problems.

Examines how student protest against structural inequalities on campus pushes academic institutions to reckon with their legacy built on slavery and stolen Indigenous lands Using campus social justice movements as an entry point, Leigh Patel shows how the struggles in higher education often directly challenged the tension between narratives of education as a pathway to improvement and the structural reality of settler colonialism that creates and protects wealth for a select few. Through original research and interviews with activists and organizers from Black Lives Matter, The Black Panther party, the Student Nonviolent Coordinating Committee, the Combahee River Collective, and the Young Lords, Patel argues that the struggle on campuses reflect a starting point for higher education to confront settler strategies. She reveals how blurring the histories of slavery and Indigenous removal only traps us in history and perpetuates race, class, and gender inequalities. By acknowledging and challenging settler colonialism, Patel outlines the importance of understanding the relationship between the struggle and study and how this understanding is vital for societal improvement.

The remarkable history of how college presidents shaped the struggle for racial equalitySome of America's most pressing civil rights issues- desegregation, equal educational and employment opportunities, housing discrimination, and free speech-have been closely intertwined with higher education institutions. Although it is commonly known that co

From the colonial period through the early nineteenth century, Father Thomas J. Murphy writes a compelling chronology and in depth analysis of Jesuit slaveholding in the state of Maryland.

University, Court, and Slave reveals long-forgotten connections between pre-Civil War southern universities and slavery. Universities and their faculty owned people-sometimes dozens of people-and profited from their labor while many slaves endured physical abuse on campuses. As Alfred L. Brophy shows, southern universities fought the emancipation movement for economic reasons, but used their writings on history, philosophy, and law in an attempt to justify their position and promote their institutions. Indeed, as the antislavery movement gained momentum, southern academics and their allies in the courts became bolder in their claims. Some went so far as to say that slavery was supported by natural law. The combination of economic reasoning and historical precedent helped shape a southern, pro-slavery jurisprudence. Following Lincoln's November 1860 election, southern academics joined politicians, judges, lawyers, and other leaders in arguing that their economy and society was threatened. Southern jurisprudence led them to believe that any threats to slavery and property justified secession. Bolstered by the courts, academics took their case to the southern public-and ultimately to the battlefield-to defend slavery. A path-breaking and deeply researched history of southern universities' investment in and defense of slavery, University, Court, and Slave will fundamentally transform our understanding of the institutional foundations pro-slavery thought.

The first volume in the Core Concepts of Higher Education series, *The History of U.S. Higher Education: Methods for Understanding the Past* is a unique research methods textbook that provides students with an understanding of the processes that historians use when conducting their own research. Written primarily for graduate students in higher education programs, this book explores critical methodological issues in the history of American higher education, including race, class, gender, and sexuality. Chapters include: Reflective Exercises that combine theory and practice Research Method Tips Further Reading Suggestions. Leading historians and those at the forefront of new research explain how historical literature is discovered and written, and provide readers with the methodological approaches to conduct historical higher education research of their own.

Across America, universities have become big businesses—and our cities their company towns. But there is a cost to those who live in their shadow. Urban universities play an outsized role in America's cities. They bring diverse ideas and people together and they generate new innovations. But they also gentrify neighborhoods and exacerbate housing inequality in an effort to enrich their campuses and attract students. They maintain private police forces that target the Black and Latinx neighborhoods nearby. They become the primary employers, dictating labor practices and suppressing wages. In *The Shadow of the Ivory Tower* takes readers from Hartford to Chicago and from Phoenix to Manhattan, revealing the increasingly parasitic relationship between universities and our cities. Through eye-opening conversations with city leaders, low-wage workers tending to students' needs, and local activists fighting encroachment, scholar Davarian L. Baldwin makes clear who benefits from unchecked university power—and who is made vulnerable. In *The Shadow of the Ivory Tower* is a wake-up call to the reality that higher education is no longer the ubiquitous public good it was once thought to be. But as Baldwin shows, there is an alternative vision for urban life, one that necessitates a more equitable relationship between our cities and our universities.

River of Dark Dreams places the Cotton Kingdom at the center of worldwide webs of exchange and exploitation that extended across oceans and drove an insatiable hunger for new lands. This bold reaccounting dramatically alters our understanding of American slavery and its role in U.S. expansionism, global capitalism, and the upcoming Civil War.

Following the abolition of slavery in New England, white citizens seemed to forget that it had ever existed there. Drawing on a wide array of primary sources—from slaveowners' diaries to children's daybooks to racist broadsides—Joanne Pope Melish reveals not only how northern society changed but how its perceptions changed as well. Melish explores the origins of racial thinking and practices to show how ill-prepared the region was to accept a population of free people of color in its midst. Because emancipation was gradual, whites transferred prejudices shaped by slavery to their relations with free people of color, and their attitudes were buttressed by abolitionist rhetoric which seemed to promise riddance of slaves as much as slavery. She tells how whites came to blame the impoverished condition of people of color on their innate inferiority, how racialization became an important component of New England ante-bellum nationalism, and how former slaves actively participated in this discourse by emphasizing their African identity. Placing race at the center of New England history, Melish contends that slavery was important not only as a labor system but also as an institutionalized set of relations. The collective amnesia about local slavery's existence became a significant component of New England regional identity.

In this outstanding cultural biography, the author of the New York Times bestseller *A Slave in the White House* chronicles a critical yet overlooked chapter in American history: the inspiring rise and calculated fall of the black elite, from Emancipation through Reconstruction to the Jim Crow Era—embodied in the experiences of an influential figure of the

time, academic, entrepreneur, and political activist and black history pioneer Daniel Murray. In the wake of the Civil War, Daniel Murray, born free and educated in Baltimore, was in the vanguard of Washington, D.C.'s black upper class. Appointed Assistant Librarian at the Library of Congress—at a time when government appointments were the most prestigious positions available for blacks—Murray became wealthy through his business as a construction contractor and married a college-educated socialite. The Murrays' social circles included some of the first African-American U.S. Senators and Congressmen, and their children went to the best colleges—Harvard and Cornell. Though Murray and other black elite of his time were primed to assimilate into the cultural fabric as Americans first and people of color second, their prospects were crushed by Jim Crow segregation and the capitulation to white supremacist groups by the government, which turned a blind eye to their unlawful—often murderous—acts. Elizabeth Dowling Taylor traces the rise, fall, and disillusionment of upper-class African Americans, revealing that they were a representation not of hypothetical achievement but what could be realized by African Americans through education and equal opportunities. As she makes clear, these well-educated and wealthy elite were living proof that African Americans did not lack ability to fully participate in the social contract as white supremacists claimed, making their subsequent fall when Reconstruction was prematurely abandoned all the more tragic. Illuminating and powerful, her magnificent work brings to life a dark chapter of American history that too many Americans have yet to recognize.

Literal and metaphorical excavations at Sweet Briar College reveal how African American labor enabled the transformation of Sweet Briar Plantation into a private women's college in 1906. This volume tells the story of the invisible founders of a college founded by and for white women. Despite being built and maintained by African American families, the college did not integrate its student body for sixty years after it opened. In the process, Invisible Founders challenges our ideas of what a college "founder" is, restoring African American narratives to their deserved and central place in the story of a single institution — one that serves as a microcosm of the American South.

Publisher description

Winner of the Ray Allen Billington Prize and the Phillis Wheatley Book Award "An American 'Odyssey,' the larger-than-life story of a man who travels far in the wake of war and gets by on his adaptability and gift for gab." —Wall Street Journal A black child born on the US-Mexico border in the twilight of slavery, William Ellis inhabited a world divided along ambiguous racial lines. Adopting the name Guillermo Eliseo, he passed as Mexican, transcending racial lines to become fabulously wealthy as a Wall Street banker, diplomat, and owner of scores of mines and haciendas south of the border. In *The Strange Career of William Ellis*, prize-winning historian Karl Jacoby weaves an astonishing tale of cunning and scandal, offering fresh insights on the history of the Reconstruction era, the US-Mexico border, and the abiding riddle of

race in America.

Celebrated scholar Carla Kaplan's cultural biography, *Miss Anne in Harlem: The White Women of the Black Renaissance*, focuses on white women, collectively called "Miss Anne," who became Harlem Renaissance insiders. The 1920s in New York City was a time of freedom, experimentation, and passion—with Harlem at the epicenter. White men could go uptown to see jazz and modern dance, but women who embraced black culture too enthusiastically could be ostracized. *Miss Anne in Harlem* focuses on six of the unconventional, free-thinking women, some from Manhattan high society, many Jewish, who crossed race lines and defied social conventions to become a part of the culture and heartbeat of Harlem. Ethnic and gender studies professor Carla Kaplan brings the interracial history of the Harlem Renaissance to life with vivid prose, extensive research, and period photographs.
