Technology in schools has evolved from the predominance of stand-alone computers to a blend of computer, media, communications, and other forms of technology dominated by the ubiquitous Internet and World Wide Web. In addition, K-12 education has evolved into a much more outcomes-driven enterprise that depends upon technology and data to perform many of its basic functions. The newly revised fifth edition of Educational Leadership and Planning for Technology provides educators with both the theoretical and the practical considerations for planning and implementing technology in today's schools, with an emphasis on the total application of technology including both administrative and instructional uses. Designed for preservice and inservice educators such as administrators, teachers, technology coordinators, and media specialists, this fifth edition text builds a strong foundation from which educators may provide informed leadership and become agents for realizing the powerful potential of technology in their schools. "I have used the textbook in teaching my course, Leadership in Educational Technology, in an online format the past four springs. I began the course and found this text to be the best available. I am still of that opinion." --Patrick Durow, Creighton University "I have used this text primarily because of it's accessible writing and it's completeness of coverage. I do not use many texts in my teaching, so it is a compliment to any author when I can use their work in my courses." --Steven Smith, Northern Kentucky University

There are more young people in the world today than ever before. Yet surprisingly little is known about the current state of affairs in youth development. Measuring the well-being of young people continues to be a challenge, even though its importance is widely recognised. The Commonwealth's youth flagship report, the Global Youth Development Index and Report, provides an evidence-based overview of the state of development for the nearly 1.8 billion young people between the ages of 15 and 30 in the world. The Youth Development Index (YDI) is a composite index of 18 indicators that collectively measure progress on youth development in 183 countries, including 49 of the 53 Commonwealth countries. The YDI has five domains, measuring levels of education, health and well-being, employment and opportunity, political participation and civic participation among young people.

The European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways (ADN) done at Geneva on 26 May 2000 under the auspices of the United Nations Economic Commission for Europe (UNECE) and the Central Commission for Navigation on the Rhine (CCNR) has been in force since February 2008. This version has been prepared on the basis of amendments applicable as from 1 January 2017. The Regulations annexed to the ADN contain provisions concerning dangerous substances and articles, their carriage in packages and in bulk on board inland navigation vessels or tank vessels, as well as provisions concerning the construction and operation of such vessels. They also address requirements and procedures for inspections, the issue of certificates of approval, recognition of classification societies, monitoring, and training and examination of experts. They are harmonized to the greatest possible extent with the dangerous goods agreements for other modes of transport.

Barack Obama's approval ratings are at an all-time low. A recent Gallup poll found that half of the Americans polled said Obama did not deserve a second term. Weary of the corruption that gushes from the White House faster than a Gulf Coast oil spill, voters are ready to put a cap on smear campaigns, pay-to-play schemes, recess appointments, and Chicago politics. In the updated paperback edition of her #1 New York Times bestselling book Culture of Corruption: Obama and His Team of Tax Cheats, Crooks, and Cronies, Michelle Malkin says, "I told you so," citing a new host of examples of Obama's broken promises and brass knuckled Chicago way.

In the recent decade, governments worldwide are increasingly focusing on being community-centric and outcomes-based. Consequently, they are starting to move towards outcomes-based approaches to public financial management systems. An outcomes-based approach allows government service agencies and specific program areas to organize and communicate priorities to achieve what matters and makes a difference rather than just going through the motions. Empirical evidence on how government agencies in emerging economies go about this contemporary approach and issues affecting these practices is limited. This edited collection of chapters is aimed at covering public sector reform and performance management in emerging economies with special reference to outcomes-based approaches in practice in government services. Practices from developed economies contained in the first book on the topic have been published by

Routledge in February 2021. The insights offered on the topic are written by renowned scholars who have identified important issues pertinent to those interested in public sector governance, accounting, accountability, and performance management effectiveness in emerging economies. The book will be highly accessible to researchers, academics, and students in the fields of accounting, public administration, development studies, and other non-accounting audiences alike.

The Malayan Emergency lasted from 1948 to 1960. During these tumultuous years, following so soon after the Japanese surrender at the end of the Second World War, the whole country was once more turned upside down and the lives of the people changed. The war against the Communist Party of Malaya's determined efforts to overthrow the Malayan government involved the whole population in one form or another. Dr Comber analyses the pivotal role of the Malayan Police's Special Branch, the government's supreme intelligence agency, in defeating the communist uprising and safeguarding the security of the country. He shows for the first time how the Special Branch was organised and how it worked in providing the security forces with political and operational intelligence. His book represents a major contribution to our understanding of the Emergency and will be of great interest to all students of Malay(si)a's recent history as well as counter-guerrilla operations. It can profitably be mined, too, to see what lessons can be learned for counterinsurgency operations in other parts of the world.

File noting has been in the recent past, and still is, under heated discussion in the context of Right to Information Act, 2005. It has, thus, been drawing a lot of interest from all concerned. Basic note in a file is written by an Office Assistant/ Assistant Section Officer. A good note should properly define and analyse the problem; refer to relevant rules, regulations, policies and precedents; talk about alternative solutions; discuss implications of these various alternatives and then suggest a suitable solution and a draft reply. Noting and drafting has, therefore, always been a vital part of decision-making process in the Government. the quality of Noting and Drafting has deteriorated over the years. There is hardly any publication on the subject except for some references in the manuals of office procedures. Hence, this attempt, A book for Government Officials to Master Noting and Drafting. It is a comprehensive book which talks about various concepts, the significance, features of good and bad notings, and skilful drafts citing examples drawn from actual files. Different exercises, their solutions, and samples of some good file notings and useful drafts make this book valuable for all its readers.

First published in 1999. Routledge is an imprint of Taylor & Francis, an informa company.

The association between violence and mental illness is well studied, yet remains highly controversial. Currently, there does appear to be a trend of increasing violence in hospital settings, including both civilly and forensically committed populations. In fact, physical aggression is the primary reason for admission to many hospitals. Given that violence is now often both a reason for admission and a barrier to discharge, there is a pressing need for violence to be re-conceptualized as a primary medical condition, not as the by-product of one. Furthermore, treatment settings need to be enhanced to address the new types of violence exhibited in inpatient environments and this modification needs to be geared toward balancing safety with treatment. This book focuses on violence from assessment, through underlying neurobiology, to treatment and other recommendations for practice. This will be of interest to forensic psychiatrists, general adult psychiatrists, psychiatric residents, psychologists, psychiatric social workers and rehabilitation therapists.

Christopher Viney is firmly established as Australia's leading textbook author in Financial Institutions and Markets thanks to his market-leading title Financial Institutions Instruments and Markets. Now Viney has produced a completely new text to provide first year students with a quality, authoritative product in a package that meets the unique needs of a shorter, first year course: Financial Market Essentials. Financial Market Essentials is a ground-up text from a trusted name, specifically designed for use by academics that need a resource for a 12 week course. It is carefully crafted to cover the essentials without omitting important concepts. It strikes the right balance between real-world examples and theory, is full of current issues and topical cases and, thanks to Viney's enthusiasm and style, this is a text that really engages students.

Pilih bidang tugas antara minta, bakat, tanggungjawab, kehendak semasa, gaji tetap dan skim bersara pilihan. Sesetengah orang berpendapat bekerja dengan Kerajaan adalah mudah dan tidak memerlukan sebarang kreativiti mahupun usaha yang lebih. Pekerja kerajaan juga kerap kali dilabel sebagai malas, culas dan tidak cekap. Kerjaya dengan Kerajaan tidak begitu diminati. Namun sekarang, pelbagai penambahbaikan telah dilakukan dan kerjaya di sektor Kerajaan telah mula diminati dan dihargai oleh banyak pihak.

There's never a dull moment for Goblin Slayer, as this time, his enemy seeks to strike where it'll hurt him most-Cow Girl's farm! Though he's hopelessly outnumbered, Goblin Slayer prepares to make his final stand. Of course, he could ask his guild mates for help, but who would take on a request with such high risk for such a low reward? Will they rise to his call, or is this the end for Goblin Slayer...?!

Robo-Advisory is a field that has gained momentum over recent years, propelled by the increasing digitalization and automation of global financial markets. More and more money has been flowing into automated advisory, raising essential questions regarding the foundations, mechanics, and performance of such solutions. However, a comprehensive summary taking stock of this new solution at the intersection of finance and technology with consideration for both aspects of theory and implementation has so far been wanting. This book offers such a summary, providing unique insights into the state of Robo-Advisory. Drawing on a pool of expert authors from within the field, this edited collection aims at being the vital go-to resource for academics, students, policy-makers, and practitioners alike wishing to engage with the topic. Split into four parts, the book begins with a survey of academic literature and its key insights paired with an analysis of market developments in Robo-Advisory thus far. The second part tackles specific questions of implementation, which are complemented by practical case studies in Part III. Finally, the fourth part looks ahead to the future, addressing questions of key importance such as artificial intelligence, big data, and social networks. Thereby, this timely book conveys both a comprehensive grasp of the status-quo as well as a guiding outlook onto future trends and developments within the field.
