This book constitutes an introduction to the theory of binary switching networks (binary logic circuits) such as are encountered in industrial automatic systems, in communications networks and, more particularly, in digital computers. These logic circuits, with or without memory, (sequential circuits, combinational circuits) play an increasing part in many sectors of industry. They are, naturally, to be found in digital computers where, by means of an assembly (often complex) of elementary circuits, the functions of computation and decision which are basic to the treatment of information, are performed. In their turn these computers form the heart of an increasing number of digital systems to which they are coupled by interface units which, themselves, fulfil complex functions of information processing. Thus the digital techniques penetrate ever more deeply into industrial and scientific activities in the form of systems with varying degrees of specialization, from the wired-in device with fixed structure to those systems centered on a general-purpose programmable computer. In addition, the present possibility of mass producing microminaturised logic circuits (integrated circuits, etc.) gives a foretaste of the introduction of these techniques into the more familiar aspects of everyday life. The present work is devoted to an exposition of the algebraic techni

ques necessary for the study and synthesis of such logic networks. No previous knowledge of this field of activity is necessary: any technician or engineer possessing an elementary knowledge of mathematics and electronics can undertake its reading. Ronney is an introverted young woman with a disgraceful appearance. She lives humbly in one of the poorest neighborhoods of Sheryl Valley, a town corrupted by the mafia in Southern California. With no diploma, she works hard in her parents' restaurant and provides voice-overs for children's animated movies during the weekend. In accordance with a long-standing family tradition, Ronney's twenty-fifth birthday celebration comes with a dare from her cousins: she must knock on the front door of the infamous Khan household. The Khans' reputation proceeds them, rumored to be in association with the mafia. But when Ronney knocks on the door, before she has the chance to run, the Khan family matriarch, Camilia, takes an interest in Ronney. Romney's lack of conventional beauty and disinterest in fashion draws Camilia in, leading her to offer Ronney the position of personal assistant to her eldest son, Yeraz, with a substantial salary at stake. It's an offer Ronney cannot refuse. To keep her job, Ronney's task is simple: do not fall in love with Yeraz. "Easy," she thinks. But what if destiny decides otherwise? Ugly Ronney is a romance in which the heroes enter the gallery of legendary lovers.

blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public."

This collection of short stories and prose chronicles events observed by the author during her lifetime in Northern New Mexico. Family, relatives, friends and strangers (real or imaginary) are caught off guard in everyday occurrences that evoke laughter, tears, or memories of the past. The names have, of course, been changed, and much embellishment has been added to stories which may or may not be true. Stories of innocence, family dynamics, relationships and injustice combine to bring a tongue in cheek narrative to the reader. The author adds: "My inner barrio is full of observations, whether from the neighborhood where I grew up in Santa Fe or from watching ordinary people interact with each other. I try to see the humor in whatever life throws at us and hope some of these stories will bring a chuckle or a hearty laugh to anyone willing to let their guard down as they read on." Born in Santa Fe, MARIE ROMERO CASH is an award-winning folk artist/santera who has been exhibiting her colorful works for over thirty years. She is also a writer, having authored several books on Northern New Mexican

To love in a language prised from my wishbone. To sing a landscape where village girls burst the moon with giggles. To dance through the fattest eye of a rice-grain -- to do all these in peace and war is the wish embodied in Merlinda Bobis' poetry. From her epic poem 'Cantala of the Warrior Woman Daragang Magayon' to lyric reflections on longing, and finally to an erotic poetry-dance-drama, Bobis traces the cartography of desire and its intimacy with death.
