Do you think you have a "bad memory"? Impossible, says Kevin Trudeau, the world's foremost authority on memory improvement training. There are no bad memories, only untrained memories. In order to release our natural memory, Trudeau says, we just need to learn to retrieve what we already know. As founder of the American Memory Institute, Kevin Trudeau has already helped more than one million people do just that. Each Mega Memory lesson in this book takes no more than thirty minutes per day and uses pictures, rather than the laborious word-association techniques of other memory systems, to activate our inborn memory. With this easy-to-follow system, you'll be able to instantly remember names, phone numbers, addresses, financial data, speeches, and schoolwork. Even better, Trudeau's system ensures instant recall and long-term Mega Memory. All you need is the desire to unleash your Mega Memory, and you can reap all these incredible rewards! Labeled with a learning disability at an early age, Kevin Trudeau was convinced his problem was an inability to recall information. He read everything he could on memory improvement. Eventually, he developed his own program for memory retrieval and formed the American Memory Institute. His Mega Memory home study system is the most utilized self-improvement series of all time.

Most people want to learn better and faster, retain more information, and be able to apply that knowledge at the right time. But the reality is that we forget a lot of what we learn. In fact, research shows that within just one hour, if nothing is done with new information, most people will have forgotten about 50% of what they learned. After 24 hours, this amount increases to 70%, and if a week passes without that information being used, up to 90% of it could be lost. To

improve knowledge acquisition and retention, new information must be consolidated and securely stored in long-term memory. Here are just a few ways that your relationship to your memory can be improved: Use the power of your imagination to remember systematically Create mental "file cards" for storing information Learn dates and times, names and faces, foreign languages, directions, presentations, shopping lists, and more Become a winner at bridge and other card games Understand how your memory changes over time Make yourself more memorable in social situations Get ready to increase your memory beyond your wildest dreams. Improve your memory, sharpen your mind, and change your life—at any age! As we age, our memories become unreliable; we misplace things and forget details. In Ultimate Memory Magic, memory expert Jim Karol shows that these side effects of aging are not inevitable. His memory-boosting system, called “Cogmental Intelligence,” goes beyond preserving mental acuity and actually enhances memory and mental function through lifestyle changes and mental exercises. Concentration, alertness, and focus can all be strengthened—by anyone, at any age. Karol’s cutting-edge program will show readers how to: - Sharpen their thinking and regain their mental edge - Live healthier, mentally and physically - Clear away negativity and stress - Become more creative and innovative A former steel worker who suffered from ill health, Karol used this method to transform his own life. Now he is physically healthy and renowned for his unparalleled memory. His incredible feats of memory and mentalism have been featured on The Tonight Show, The Ellen Show, Today, and more. Karol has used his Cogmental Intelligence method with clients from professional athletes to business leaders and speaks at venues around the world, from MIT to the Pentagon. With a foreword from bestselling author and physician Daniel G. Amen, Ultimate Memory Magic will allow readers of any age to hone their minds, strengthen their memories, and transform their lives.

Benny Lewis, who speaks over ten languages—all self-taught—runs the largest language-learning blog in the world, Fluent In 3 Months. Lewis is a full-time "language hacker," someone who devotes all of his time to finding better, faster, and more efficient ways to learn languages. Fluent in 3 Months: How Anyone at Any Age Can Learn to Speak Any Language from Anywhere in the World is a new blueprint for fast language learning. Lewis argues that you don't need a great memory or "the language gene" to learn a language quickly, and debunks a number of long-held beliefs, such as adults not being as good of language learners as children.

Can we really memorize anything? The answer is, 'Yes we can!' From Guinness World Record holders (for conducting the largest maths class on memorizing times tables till 99) Aditi Singhal and Sudhir Singhal comes a book that will serve as a manual to explore the immense power of your memory through a scientific yet simple approach. It will: • Explain concepts with simple

illustrations • While teaching you memory techniques, it will also discuss their application in real life, like memorizing appointments, presentations, names and faces, long answers, spellings, formulae, vocabulary, foreign languages and general information • Give the scientific interpretation of ancient memory-enhancing practices that will be particularly useful for students, teachers, professors, doctors, managers, marketing and other professionals as well as the common man Following the unparalleled success of How to Become a Human Calculator, Aditi Singhal and Sudhir Singhal turn their hands to helping you master the right method to input any information using which you can easily memorize anything and, more important, recall it whenever required. Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: "The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study." - Geoff van der Meer, VP engineering "This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision." - Zachary Danz, foreign teacher, children's theatre artist About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, Hacking Chinese, where I write regularly about how to learn Mandarin.

What is a memory palace? And how exactly do you build one? Unlike other popular books on the subject, "How to Build a Mnemonic Memory Palace" focuses on practical, hands on advice. Information that will help you get started making your own memory palaces. Memory palaces are an ancient, somehow forgotten, method of memorizing all kinds of information. Our brain is a muscle. Like our bodies, it needs exercise. In the last few hundred years, we have stopped training our memories and we have lost the ability to memorize large amounts of information—something our ancestors could do with ease. After discovering that the true purpose of monuments like Easter Island and Stonehenge were to act as memory palaces, Kelly takes this knowledge and introduces us to the best memory techniques humans have ever devised, from ancient times and the Middle Ages to methods used by today's memory athletes. A memory champion herself, Kelly tests all these methods and demonstrate the extraordinary capacity of our brains at any age. For anyone who needs to memorize a speech or a script, learn anatomy or a foreign language, or prepare for an exam, Memory Craft offers proven techniques and simple strategies for anyone who has trouble remembering names or dates, or for older people who want to keep their minds agile. In addition to getting in touch with our own human and anthropological foundations, Memory Craft shows how all things mnemonic can be playful, creative, and fun.

The discovery of a powerful memory technique used by our Neolithic ancestors in their monumental memory places—and how we can use their secrets to train our own minds In ancient, pre-literate cultures across the globe, tribal elders had encyclopedic memories. They could name all the animals and plants across a landscape, identify the stars in the sky, and recite the history of their people. Yet today, most of us struggle to memorize more than a short poem. Using traditional Aboriginal Australian song lines as a starting point, Dr. Lynne Kelly has since identified the powerful memory technique used by our ancestors and indigenous people around the world. In turn, she has then discovered that this ancient memory technique is the secret purpose behind the great prehistoric monuments like Stonehenge, which have puzzled archaeologists for so long. The henges across northern Europe, the elaborate stone houses of New Mexico, huge animal shapes in Peru, the statues of Easter Island—these all serve as the most effective memory system ever invented by humans. They allowed people in non-literate cultures to memorize the vast amounts of information they needed to survive. But how? For the first time, Dr. Kelly unlocks the secret of these monuments and their uses as "memory places" in her fascinating book. Additionally, The Memory Code also explains how we can use this ancient mnemonic technique to train our minds in the tradition of our forbearers.

NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. "A brilliant and thoroughly modern guide to learning new languages."—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.
