"This material has taught me more about hypnosis than my previous 20 years in psychology and 4 years as a practicing Hypnotherapist [and] should be a standard requirement for ANY Hypnotist wanting to bring about real change. If you don't learn this stuff you will be left behind!" - Michael Skirving, DNLP, DHyp, LAPHP Hypnosis: is it actually real? What causes its strange effects? And can everyone easily learn to do it? Since the seminal work of hypnosis pioneer James Braid in the 1840s, the dominant model for understanding hypnosis has been that it is simply a special state (popularly referred to as 'hypnotic trance') that renders people unusually responsive to suggestion. By this model, the practice of hypnosis is simply that of the induction of hypnotic trance, followed by the delivery of suggestions for the desired results. By summer 2008, James Tripp had been working professionally with hypnosis for 6 years. Whilst he had used what he had learned to great effect with his clients (from manual therapy to coaching and changework), it had become increasingly clear that something was amiss with the traditional trance model - instead of his clients responding to suggestion as a result of entering 'trance', they were apparently entering 'trance' as a result of being given suggestions. The cart seemed very much before the horse. This led Tripp to embark on a mission to break down and rebuild hypnosis and suggestion work; to uncover how it really worked and also to see if it could be done more effectively and efficiently. To find a suitable laboratory for his research he stepped out of his hypnotherapy office and onto the streets of London. Across the next year he developed consistent methods for

the effective evocation of classic hypnotic phenomena without using trance inductions; simply structuring suggestions and making requests that worked with people's everyday cognitive faculties to create mind-bending results. In 2009 Tripp started demonstrating his work and sharing his ideas via the Hypnosis Without Trance blog. The content was divisive to say the least - while some traditionalists were upset or angered by the assertions, many others were liberated and empowered by the material. "Hypnosis Without Trance has blown my mind and completely changed my thoughts on how hypnosis works with my clients - it's clicked together a lot of gaps that my traditional learning couldn't explain..." - Michelle Marsh, (Hypnotherapist) "I think this is the most clear and understanding approach I have ever seen or read. Thanks a lot!" - Raul de la Horra (Hypnotist, Psychotherapist and Magician) This book represents the culmination of that period of experimentation and rebuilding, presenting a new central model for hypnosis (The Hypnotic Loop). Further to this it extensively unpacks the tools, tactics and psychological subtleties required for the effective facilitation of powerful hypnotic experiences. Hypnosis Without Trance is for you if you are looking to understand how hypnosis really works, and how you might better facilitate it. Whether you are a student of hypnosis, established practitioner or curious spectator, its clear exposition will significantly deepen your understanding and grasp of this fascinating craft. "Definitely the next important big step for me - a practicing hypnotherapist for over 20 years. Absolutely brilliant! Thank you!!" - Richard Whitehurst (Hypnotherapist) "I gained more

understanding of how hypnosis really works from HWT than anywhere else, and think it's a must for anyone serious about hypnosis." - Lazarus Stone (Professional Mentalist)

"Using this approach I have gained more confidence and I am far more relaxed as a hypnotist than any time in the past 20 years." - Gary Plumridge (Hypnotherapist)

If you want to find an answer to this question, keep reading! Manipulation has been around for a long time, and it is not a new or imaginary concept. Understanding what the art of persuasion is really about is vital to help you deal with it. We like to believe that we are individuals who make sensible choices. We do not always have full control of our life journey, and we don't always realize this. As children, we are influenced by our parents and have little control over how we are raised. Once in the education system, teachers will tell us all about the social norms and what is expected of us in society. As adults, we are lured in by politicians trying to get their share of votes. This gives such power to politicians, and their decisions will affect our lives. As for commerce, companies can persuade customers to buy their goods and services. Are we really in control of our lives, or are we merely influenced by those who know all the persuasion tricks? In this book, we will look briefly at the psychology of manipulation. This allows us to see where it might occur in our lives. It will also allow you to identify those who might attempt to manipulate you. It is not only about people who like to dominate. Then, we will find out how to deal with various manipulative methods, even sometimes covert. This guide

Has someone ever taken advantage of you for their benefit? Has someone you loved entered your life fast and then left without so much as an explanation after they took everything they could from you? If you are nodding your head, then you have come to the right place. The foundations of the study of dark psychology are not modern. The models of classical comedy and tragedy during the height of the Greek Empire illustrate an understanding of this uniquely human capacity even during ancient times. The comedies and tragedies of ancient Greek theater were used as a means for society to experience catharsis--a collective exercise in which social bonding occurred by the creation and release of social tensions as a means of resolving societal conflicts. But what is at the heart of this classical method of employing art as a means of regulating

society is society's need to be regulated because of the unique capacity of human beings to act in ways that are destructive and harmful without any apparent practical purpose or necessity. This capacity is what clinical psychologists refer to as dark psychology. Consider that species other than humans, such as lions, wolves, bears, or birds of prey, may track, target, hunt, and kill smaller, less powerful animals, such as deer, cattle, sheep, rabbits, and rodents. Yet, the reason for this predatory behavior is necessity, not cruelty or malevolence. In addition, when predatory animals hunt, they are likely to target the most vulnerable and the weakest, not out of any sense of meanness or malice, but because engaging with a weaker opponent involves less risk and less effort. Thus, the violence and destruction of natural predators serves practical needs--to feed themselves and their young in an effort to propagate their species. Here's a tiny fraction of what you will learn: ? Dark persuasion methods ? Covert emotional manipulation tactics ? Toxic relationships and how to deal with them ? Secrets for speed reading and analyzing people ? Dark hypnosis and hypnotherapy ? Dark Seduction ...And more subtle advanced techniques! It is tempting to argue that human beings have developed their unique capacity for dark psychology and manipulation as a means of propagating their survival in this unique environment. Take for instance a business man who cheats on his taxes to gain an advantage in the business world, a lawyer who alters evidence to win a case, or a politician who lies to his constituents to win an election may be compared to the abilities of wild bears who hunt and kill deer or

other game. Yet, animals in the wild never engage in predatory conduct that is marked by cruelty, maliciousness, or greed. Doing so would lead to their extinction. This complete social-behavioral manual will give you the key to fully understand human nature at his deepest level and provide you with all the knowledge and skills needed to survive in this dark world. Don't let yourself be victimized any longer. Manipulation is all around you, and it's impossible to escape. But it's possible to fight and turn their tactics against them. What are you waiting for?
