In the tradition of *Into the Wild* comes an instant classic of outdoor literature, a riveting work of uncommon depth: *The Adventurer's Son* is Roman Dial's extraordinary account of his two-year quest to unravel the mystery of his son's disappearance in the jungles of Costa Rica. In the predawn hours of July 10, 2014, the twenty-seven-year-old son of preeminent Alaskan scientist and National Geographic Explorer Roman Dial, walked alone into Corcovado National Park, an untracked rainforest along Costa Rica's remote Pacific Coast that shelters miners, poachers, and drug smugglers. He carried a light backpack and machete. Before he left, Cody Roman Dial emailed his father: "I am not sure how long it will take me, but I'm planning on doing 4 days in the jungle and a day to walk out. I'll be bounded by a trail to the west and the coast everywhere else, so it should be difficult to get lost forever." They were the last words Dial received from his son. As soon as he realized Cody Roman's return date had passed, Dial set off for Costa Rica. As he trekked through the dense jungle, interviewing locals and searching for clues—the authorities suspected murder—the desperate father was forced to confront the deepest questions about himself and his own role in the events. Roman had raised his son to be fearless, to be at home in earth's wildest places, travelling together through rugged Alaska to remote Borneo and Bhutan. Was he responsible for his son's fate? Or, as he hoped, was Cody Roman safe and using his wilderness skills on a solo adventure from which he would emerge at any moment? Part detective story set in the most beautiful yet dangerous reaches of the planet, *The Adventurer's Son* emerges as a far deeper tale of discovery—a journey to understand the truth about those we love the most. *The Adventurer's Son* includes fifty black-and-white photographs.

Even in our hyper-connected world, there are tribes scattered across the far reaches of the globe who still live much the same way that their ancestors did thousands of years ago. Having had minimal contact with the outside world, these peoples currently live in harmony and unison with the environment around them. But as technology grows and the human population expands, the way of life of these tribes becomes increasingly threatened with every passing day. In *The Rainforest Survivors*, veteran overseas reporter Paul Raffaele recounts his time spent with three unique jungle tribes—the peace-loving Congo Pygmies, New Guinea's tree-dwelling Korowai cannibals, and the Amazon's ferocious Korubo. Over months spent living in these three communities, Raffaele experienced firsthand wisdom and mysterious rites forged over many millennia. Resonating with high adventure and remarkable characters, *The Rainforest Survivors* details the daily lives of these relatively unknown peoples and provides key political and environmental context, showing how outside forces are closing in on them and threatening to change forever their ways of life. Enthralling and unforgettable, this compelling book is the important portrait of indigenous peoples living the way they have for centuries.

A heartfelt, visually stunning picture book from Caldecott Honor and Robert F. Sibert Medal winner Juana Martinez-Neal illuminates a young girl's day of play and adventure in the lush rain forest of Peru. Zonia's home is the Amazon rain forest, where it is always green and full of life. Every morning, the rain forest calls to Zonia, and every morning, she answers. She visits the sloth family, greets the giant anteater, and runs with the speedy jaguar. But one morning, the rain forest calls to her in a troubled voice. How will Zonia answer? Acclaimed author-illustrator Juana Martinez-Neal explores the wonders of the rain forest with Zonia, an Asháninka girl, in her joyful outdoor adventures. The engaging text emphasizes Zonia's empowering bond with her home, while the illustrations—created on paper made from banana bark—burst with luxuriant greens and delicate details. Illuminating back matter includes a translation of the story in Asháninka, information on the Asháninka community, and resources on the Amazon rain forest and its wildlife.

Sibert Honor winner Sy Montgomery explores how tiny fish living in the Amazon river, called piabas, can help preserve not only the rainforest and its often misunderstood inhabitants, but the fate of our entire environment. This installment in the *Scientists in the Field* series includes gorgeous full-color photography.
