At Krisp we made a number of important choices to ensure you feel good about using this comic book - please read about our Eco-friendly practices below. A statement from the manufacturer of our products: "Environmental consciousness is important to us. As a manufacture on-demand company, we produce units only as they're ordered, which reduces excess production. Our ink is chlorine-free, and our acid-free interior paper stock is supplied by a Forest Stewardship Council-certified provider. We currently offer a cream paper for black and white book interiors that is made from 30% post-consumer waste recycled material. We also maintain a commitment to recycling waste materials resulting from the printing process and from daily office operations, and we will continue to review our practices to ensure we are doing our part to protect the environment." All of our products are made in the country where the order is placed and delivered - including U.S.A., Japan, Britain, Germany, Spain, France, Italy and more! We do not use real leather but we do appreciate the aesthetics - you will find that the dark strip printed on the side of most notebooks mimics leather pattern so that you may enjoy the look without harming animals. Hard, plastic, leather and synthetic covers put unnecessary strain on the environment. We use sturdy paperbacks with a layer of protective surface that cause less pollution and are easily recycled. As a paper products company that prints books for children we cannot compromise on these distinctive features as we work to preserve the planet for future generations.

A comprehensive guide to visual storytelling from Savannah College of Art and Design (SCAD), one of the world's leaders in sequential arts instruction. Storyboarding is the process of graphically organizing a project--a motion picture, animation, motion graphic, or interactive media sequence--in order to translate artists' ideas from story to screen. Whether you're a filmmaker, animator, ad director, writer, or video-game artist--storyboarding is a skill that is absolutely critical. Storyboarding Essentials covers everything students and working professionals need to master the art of writing and formatting scripts, creating frames, and following visual logic to create a cohesive narrative.

Francis Glebas, a top Disney storyboard artist, shows how to reach the ultimate goal of animation and moviemaking by showing how to provide audiences with an emotionally satisfying experience. Directing the Story offers a structural approach to clearly and dramatically presenting visual stories. With Francis' help you'll discover the professional storytelling techniques which have swept away generations of movie goers and kept them coming back for more. You'll also learn to spot potential problems before they cost you time or money and offers creative solutions to solve them. Best of all, it practices what it preaches, using a graphic novel format to demonstrate the professional visual storytelling techniques you need to know.

Each page contains everything you need to properly structure any story. Perfect for directors, film makers, advertisers, screenwriters, marketing professionals, animators, writers, video game developers, creative storytellers, and much more. This is a wonderful asset for professionals, students, and hobbyists alike. The perfect workflow is provided on each page through the use of 6 panels in a 2 by 3 grid. Each story board holds dedicated sections for information such as the scene, shot and frame, timing, shot type, and description. Panels are scaled to a 16:9 ratio to create a seamless workflow. Features: 220 Pages at 8.5"x11" Project title and page numbers on each page 3 extra blank table of contents pages Plenty of room to describe and add notes to each panel Efficient and organized workflow Professionally designed cover and interior that are perfect for any environment

What is storyboarding? Storyboarding is about taking a script or a concept and turning it into a visual story using storyboards. You need to be able to draw well enough to allow yourself or your production team to envision and develop your ideas, test how they will work, and highlight any potential obstacles with the structure or layout of the story before you begin production. Therefore you need to practice. Open a storyboard blank template and sketch your ideas. If they don't work or if you come up with a better idea, rub them out and scetch out new ones. The more you understand about how to make your production visually interesting in your sketches the better your end product will be. Add notes about what's going on in your images. Refer to the front cover to see what you might like to record in the spaces above and below each panel, but I have left the spaces blank inside the storyboard book because you will want to use different criteria according to each project, or what stage you are up to in each project. There is an index at the front of your storyboard movie maker to bookmark whatever suits your project best. (Initial thumbnails, first draft, new chapters, new projects, particularly good ideas etc.) By the end of the storyboarding notebook you will be able to go through your storyboard writing examples and track your progress and you will have a record of what works best for you. Do more of what worked best. I hope you become an awesome storyboarder! ) Paperback - 130 pages - 8.5" x 11"
